Taming The Tiger The Struggle To Control Technology:

ThirdWay, 1985-11 Monthly current affairs magazine from a Christian perspective with a focus on politics society economics and culture *Taming the Tiger* Witold Rybczynski, 1983 **Tendencies and Tensions of the Information Age** Jorge Reina Schement, Terry Curtis, 1995-01-01 The development of technology and the hunger for information has caused a wave of change in daily life in America Nearly every American s environment now consists of cable television video cassette players answering machines fax machines and personal computers Schement and Curtis argue that the information age has evolved gradually throughout the twentieth century National focus on the production and distribution of information stems directly from the organizing principles and realities of the market system not from a revolution sparked by the invention of the computer Now available in paperback **Tendencies and Tensions of the Information Age** brings together findings from many disciplines including classical studies etymology political sociology and macroeconomics This valuable resource will be enjoyed by sociologists historians and scholars of communication and information studies **The Social and Interactional Dimensions of Human-Computer Interfaces** Peter J. Thomas, 1995-05-26 This volume analyzes the social implications of computer interfaces **The Global Issues of Information Technology Management** Shailendra Palvia, Prashant Palvia, Ronald Zigli, 1992-01-01 With the political and social changes taking place in Eastern Europe combined with the changes in Western European markets and Japanese global marketing strategies American corporations now can utilize information technology as the ultimate weapon in reshaping expanding their global marketing strategies Today global information technology is not just a set of tools for computing but rather is viewed as a strategic tool to bring organizations growth and prosperity **The Global Issues of Information Technology Management** is the right source for discovering untapped potential of your information technology It is a global tool for the growth and prosperity of your organization **Strategic Knowledge Management in Multinational Organizations** O'Sullivan, Kevin, 2007-08-31 This book presents a comprehensive set of investigations of a wide range of environmental factors both internal and external that contribute to the key challenge of complexity in KM These factors include culture technology communications infrastructure and learning and leadership structures Provided by publisher **Between Modernism and Conceptual Art** Robert C. Morgan, 1997-07-01 Art criticism in the 1980s was highly influenced by market forces that somewhat changed the face of the art world A mediocre show purchased by a wealthy investor or collector received disproportionate coverage in the New York press particularly those glossy four color journals that were highly dependent upon the advertising dollars of galleries auction houses vodka companies airlines and fashion designers Lost in the coverage of market driven art was that it was not necessarily the most advanced or even the most significant work of the decade This work provides an alternative viewpoint to the general American cultural discourse of the 1980s showing that the real situation was not the exclusionary rhetoric of Postmodernism but was instead the conflict between late Modernism and Conceptual Art The 24 essays range from

discussions on Joseph Beuys and Allan Kaprow to studies of French artist Tania Mouraud and Polish artist Jan Zakrzewski It also includes a lengthy commentary on art and technology along with a look at performance and installation art Instructors considering this book for use in a course may request an examination copy here **Collecting Nature** Andrew G. Kirk, 2001 Finds in the history of Denver's Conservation Library a microcosm of the growth of the environmental movement as a whole

Counterculture Green Andrew G. Kirk, 2007 For many it was more than a publication it was a way of life The Whole Earth Catalog billed itself as Access to Tools and it grew from a Bay Area blip to a national phenomenon catering to hippies do it yourselfers and anyone interested in self sufficiency independent of mainstream America now known as living off the grid In recovering the history of the Catalog's unique brand of environmentalism historian Kirk recounts how Stewart Brand and the Point Foundation promoted a philosophy of pragmatic environmentalism that celebrated technological achievement human ingenuity and sustainable living Kirk shows us that Whole Earth was more than a mere counterculture fad At a time when many of these ideas were seen as heretical to a predominantly wilderness based movement it became a critical forum for environmental alternatives and a model for how complicated ecological ideas could be presented in a hopeful and even humorous way From publisher description **Technophobia!** Daniel Dinello, 2005 A timely examination of the conflict between the techno utopia promised by real world scientists and the techno dystopia predicted by science fiction
