*The Encyclopedia of Weapons of World War II* Chris Bishop,2002 A lavishly illustrated compendium of military hardware covers everything that fought in the air on the ground and on the seas during World War II There are more than 500 separate items of equipment used between 1939 and 1945 from combat handguns to massive aircraft carriers More than 600 full color artworks accompany entries that feature a detailed history of each weapon s design and development along with a full specifications table that includes performance dimensions armament and crew details A must have for military buffs

**The Second World War Tank Crisis** Dick Taylor,2021-06-30 British Second World War tanks performed so badly that it is difficult to bring to mind any other British weapon of the period that provokes such a strong sense of failure Unfortunately many of the accusations appear to be true British tanks were in many ways a disgrace But why was Britain the country that invented them consistently unable to field tanks of the required quality or quantity throughout the conflict This perceived failure has

taken on the status of a myth but like all myths it should not be accepted at face value it should be questioned and analyzed And that is what Dick Taylor does in this closely researched and absorbing study He looks at the flaws in British financial policy tank doctrine design production and development before and throughout the war years which often had fatal consequences for the crews who were sent to fight and to be murdered in mechanical abortions Their direct experience of the shortcomings of these machines is an important element of the story He also considers how British tanks compared to those of the opposition and contrasts tank production for the army with the production of aircraft for the RAF during the same period His clear sighted account goes on to explain how later in the conflict British tank design improved to the point where their tanks were in many ways superior to those of the Americans and Germans and how they then produced the Centurion which was one of the best main battle tanks of the post war era

**The Encyclopedia of Tanks & Armoured Fighting Vehicles** Chris Bishop,2006 This volume begins with the armoured vehicles of World War I such as the Lanchester armoured car and Sturmpanzerwagen A7V tank and comes right up to date to the modern era covering the latest tanks and armoured vehicles such as the Challenger II tank and the M88 armoured recovery vehicle
