Tanner Lectures On Human Values 1981:

The Tanner Lectures on Human Values, 1980 Sterling M. McMurrin, 1980 *The Tanner Lectures on Human Values* McMurrin, 2011-04-28 A prestigious series of lectures that are international and intercultural and transcend ethnic national religious and ideological distinctions *Handbook of Income Distribution* Anthony Barnes Atkinson, François Bourguignon, 2000 The Tanner Lectures on Human Values Sterling M. McMurrin, 2011-04-28 A prestigious series of lectures that are international and intercultural and transcend ethnic national religious and ideological distinctions

Intentionality, Deliberation and Autonomy Sandro Nannini, 2016-05-23 Many important thinkers in the philosophical tradition like Aristotle or Hume have used an explicit theory of action as the basis of their respective normative theories of practical rationality and morality The idea behind this architecture of theories is that action theory can inform us about the origin bonds reach and limits of practical reason The aim of this book is to revive this direct connection between action theory and practical philosophy in particular to provide systematic action theoretical underpinnings for the discussion about the normative structure of practical reason This book brings together a collection of specially commissioned essays from internationally prestigious scholars in the field and represents the state of the art in contemporary philosophy of action The book is divided into three parts i conceptual work about what actions intentions and intentional actions are ii empirical theory of practical deliberation and iii theories about the action theoretic features of autonomy The volume significantly advances these three lines of research and offers important new contributions to each of them National Union Catalog, 1981 , 1982 **Tijdschrift voor filosofie** , 1986 **The New Demons** Simona Forti, 2014-11-12 The Italian philosopher and author of *Totalitarianism* rescues the concept of evil as an element necessary for guidance in political reflection *Dialogue Canadian Philosophical Review* As long as we care about suffering in the world says political philosopher Simona Forti we are compelled to inquire into the question of evil But is the concept of evil still useful in a postmodern landscape where absolute values have been leveled and relativized by a historicist perspective Given our current unwillingness to judge others what signposts remain to guide our ethical behavior Surveying the nineteenth and twentieth century Western philosophical debates on evil Forti concludes that it is time to leave behind what she calls the Dostoevsky paradigm the dualistic vision of an omnipotent monster pitted against absolute helpless victims No longer capable of grasping the normalization of evil in today's world whose structures of power have been transformed this paradigm has exhausted its explanatory force In its place Forti offers a different genealogy of the relationship between evil and power one that finally calls into question power's recurrent link to transgression At the center of contemporary evil she posits the passive attitude towards rule following the need for normalcy and the desire for obedience nurtured by our contemporary mass democracies In our times she contends evil must be explored in tandem with our stubborn desire to stay alive at all costs as much as with our deep need for recognition the new modern absolutes A courageous book *The New Demons* extends an original inspiring call to ethical living

in a biopolitical age **Value Judgement** James Griffin,1996 How and how much can we improve our ethical standards not lift our behaviour closer to our standards but refine the standards themselves To answer this question the book explores many of the questions of ethics It includes discussion of what is a good life and how values relate to the world *Subject Catalog, 1981* Library of Congress,1981 **Patriation and Its Consequences** Lois Harder,Steve Patten,2015-06-17 Few moments in Canadian history are as intriguing as the political battle between Prime Minister Pierre Trudeau and the Gang of Eight provincial premiers who opposed his plans to patriate Canada s constitution from Britain This volume revisits these constitutional negotiations including the personalities visions and political struggles that shaped the resulting constitutional agreement Offering fresh perspectives on the politics of this key moment in Canadian history it focuses on the players behind the patriation process including First Nations and feminist activists who helped shape Canada s new constitution *Patriation and Its Consequences* also explores the long shadow of patriation including the alienation of Quebec the character of Canadian federalism Indigenous constitutionalism and Aboriginal treaty rights and the struggle to ensure gender equality rights in Canada *The Cumulative Book Index* ,1985 A world list of books in the English language Controlling Public Education Kathryn A. McDermott,1999 Most Americans believe that local school districts are the only means by which citizens may exercise control over public education Kathryn McDermott argues to the contrary that existing local institutions are no longer sufficient for achieving either equity or democratic governance Not only is local control inequitable it also fails to live up to its reputation for guaranteeing public participation and citizen influence Drawing upon democratic theory and the results of field research in New Haven Connecticut and three suburbs McDermott contends that our educational system can be made more democratic by centralizing control over funding while decentralizing most authority over schools to the level of schools themselves while enacting public school choice controlled for racial balance To many people in Connecticut and elsewhere the tension between equal opportunity for all students and local control of public education seems impossible to resolve In 1996 the Connecticut Supreme Court ruled in *Sheff v O Neill* that local control produces unconstitutional segregation of public schools Nearly all of the state s 169 towns operate their own public schools and like the towns they serve the schools are generally homogeneous with respect to race and socioeconomic class In the *Sheff* ruling the court declared that making school districts coterminous with town lines is the single most important factor contributing to the present concentration of racial and ethnic minorities in the Hartford public school system At the same time the court also acknowledged that the town based school system presently furthers the legitimate nonracial interests of permitting considerable local control and accountability in educational matters In Connecticut and elsewhere it has often seemed necessary to choose between local control and equity in public education and local control has almost always won McDermott argues that rather than seeing local control and equity as conflicting goals policymakers should regard them as equally important components of democracy in public education In her view a truly democratic system of education should both

encourage citizen participation in school governance and contribute to the formation and maintenance of a social order in which equality of opportunity prevails over hierarchies of privilege Centralizing distribution of resources and using controlled choice to end racial isolation would provide greater equality of opportunity while decentralizing management of schools would expand citizen participation McDermott's conclusions break new ground in our understanding of local school governance itself and call into question the conventional wisdom about local participation These findings should interest those who study school governance and reform especially in an urban setting as well as policy makers administrators teachers students and citizens eager to improve their schools

Contexts of Justice Rainer Forst, 2002-02-27 This text offers an intervention into the debate between communitarianism and liberalism It argues for a theory of contexts of justice that leads beyond the confines of the debate as it has been understood and posits the possibility of a new conception of social and political justice

Wallace Stegner Jackson J. Benson, 1997 Drawing on nearly ten years of research and hundreds of hours on interviews this authorized biography traces the trajectory of Wallace Stegner's life from his prairie childhood in Saskatchewan and teenage years in Salt Lake City to his prominence in the environmental movement of photos

Nietzsche's Genealogical Method Árpád Szakolczai, 1993

Global Law Without a State Gunther Teubner, 1997 This work deals with legal pluralism in an emerging world society Its central thesis is that globalization of law tends to create a decentred law making process which occurs in multiple sectors of civil society independently of nation states Technical standardization professional rule production human rights intra organizational regulation in multinational enterprises contracting arbitration and other institutions of *lex mercatoria* are forms of rule by private governments claiming world wide validity independently of the law of the nation states They have come into existence not by formal acts of nation states but by strange paradoxical acts of self validation
