English-only Europe? Robert Phillipson,2003 First Published in 2003 Routledge is an imprint of Taylor Francis an informa company *European Language Matters* Peter Trudgill,2021-11-11 Why do Greek lorries have Metaphor s written on the side Is it grammatically correct to say the best team won after a football match What is the difference between manly

male masculine and macho Bringing together Peter Trudgill's highly popular columns for the New European this fascinating collection explores how English has been influenced both linguistically and culturally by its neighbouring languages in Europe English is very much a European language and Trudgill delves in to the rich linguistic legacy that links all European languages The bite sized pieces are grouped together in thematically arranged sections to allow the reader to dip in and out at will and cover a wide range of topics from the etymology of words to illuminating pieces on grammar Written in an engaging and lively style and full of intriguing facts about language and languages in Europe this book will appeal to both language specialists and to general readers with no prior experience The English Language in the Digital Age Georg Rehm, Hans Uszkoreit, 2012-07-05 This white paper is part of a series that promotes knowledge about language technology and its potential It addresses educators journalists politicians language communities and others The availability and use of language technology in Europe varies between languages Consequently the actions that are required to further support research and development of language technologies also differ for each language The required actions depend on many factors such as the complexity of a given language and the size of its community META NET a Network of Excellence funded by the European Commission has conducted an analysis of current language resources and technologies This analysis focused on the 23 official European languages as well as other important national and regional languages in Europe The results of this analysis suggest that there are many significant research gaps for each language A more detailed expert analysis and assessment of the current situation will help maximise the impact of additional research and minimize any risks META NET consists of 54 research centres from 33 countries that are working with stakeholders from commercial businesses government agencies industry research organisations software companies technology providers and European universities Together they are creating a common technology vision while developing a strategic research agenda that shows how language technology applications can address any research gaps by 2020 *Democracy, Social Resources and Political Power in the European Union* Niilo Kauppi, 2005-07-22 Democracy social resources and political power in the European Union develops a structural constructivist theory of the European Union and critically analyses through French and Finnish empirical cases the political practices that maintain the Union's democratic deficit Lawyering Europe Antoine Vauchez, Bruno de Witte, 2013-03-13 While scholarly writing has dealt with the role of law in the process of European integration so far it has shed little light on the lawyers and communities of lawyers involved in that process Law has been one of the most thoroughly investigated aspects of the European integration process and EU law has become a well established academic discipline with the emergence more recently of an impressive body of legal and political science literature on European law in context Yet this field has been dominated by an essentially judicial narrative focused on the role of the European courts underestimating in the process the multifaceted roles lawyers and law play in the EU polity notably the roles they play beyond the litigation arena This volume seeks to promote a deeper understanding of European law as a social

and political phenomenon presenting a more complete view of the European legal field by looking beyond the courts and at the same time broadening the scholarly horizon by exploring the ways in which European law is actually made To do this it describes the roles of the great variety of actors who stand behind legal norms and decisions bringing together perspectives from various disciplines law political science political sociology and history to offer a global multi disciplinary reassessment of the role of law and lawyers in the European integration process
