Taskcentered Social Work

Taskcentered Social Work:

Task-Centred Social Work Mark Doel, Peter Marsh, 2017-03-02 Task centred practice is a forward thinking goal orientated approach to social work. It is a practice based approach built on research which reflects the new mood being developed in the social work field and it has now been successfully used in a wide variety of settings and circumstances. The theme of Task Centred Social Work is partnership exploring the principles on which task centred practice is based while offering clear and practical guidance for work whether with people who seek help with social problems or with those who are involuntary clients. The book describes in detail the sequence of work to help clients move from present problems to future goals. This is illustrated by a case study which runs through the chapters and uses an imaginative recording style. Checklists and bibliographies are also used to aid understanding. The authors respond to the model's critics and explore both the scope and the limitations of the task centred practice. Social professionals whether working in practice or in training settings will find this book an invaluable aid to the development of successful social practice work.

Problems, Tasks and Outcomes

E. Matilda Goldberg, Jane Gibbons, Ian Sinclair, 2021-11-07 In the 1980s although most social workers organised their time and described their work in terms of cases research studies had cast serious doubts on the efficacy of working in this way. As a result there had been growing anxiety about what social workers do what they ought to do and the training they needed. Task centred casework was an approach to social work which proposed a solution to some aspects of this dilemma. Growing out of the surprising results of an American research study it broke free from the traditional psycho analytic approach to casework. It aimed at clarity of purpose a concentration on the clients perceptions of the problems openness about clients and helpers intentions and agreement about what is to be done and achieved within a specified time. Originally published in 1985 this book brings together three British studies that accompanied and in some respects pioneered the introduction of task centred casework into the United Kingdom. The studies describe and evaluate task centred casework with social services department clients with young people on probation and with men and women referred to hospital after poisoning themselves. The research suggests what task centred casework can and cannot achieve describes how clients experience it and seeks to define the skills it requires. The studies also provide some reasons why many previous studies of social work have failed to find evidence for social work effectiveness. The book uses much case material to illustrate methods of task centred casework and its outcomes as seen by clients social workers and an independent outsider. It should still be of interest to social workers teachers of social work and social work students. More generally it will be welcomed by all those who are interested in building social work on a surer basis than anecdote and fashion.

Practice Nick Coady, Peter Lehmann, 2007-10-22 Praise for the first edition Finally a social work practice text that makes a difference. Social Work Treatment Francis J. Turner, 2011-03-15

First published in 1974 Social Work Treatment remains the most popular and trusted compendium of theories available to social work students and practitioners It explores the full range of theoretical approaches that drive social work treatment and knowledge development from psychoanalysis to crisis

intervention This treasure trove of practice knowledge equips professionals with a broad array of theoretical approaches each of which shine a spotlight on a different aspect of the human condition Emphasizing the importance of a broad based theoretical approach to practice it helps the reader avoid the pitfalls of becoming overly identified with a narrow focus that limits their understanding of clients and their contexts This sweeping overview of the field untangles the increasingly complex problems ideologies and value sets that define contemporary social work practice The result is an essential A to Z reference that charts the full range of theoretical approaches available to social workers regardless of their setting or specialty

Reid,2002-11-21 This book provides a comprehensive examination of instructional supervision and introduces the Task Centered Model for Educational Supervision TCS It begins by reviewing the history of educational supervision in social work and principles of effective teaching practices in the field While theories about the principles and purposes of educational supervision abound it has proven difficult to translate these ideas into a coherent model of supervisory practice Educational Supervision in Social Work answers that need presenting in detail TCS an ordered

series of discrete activities that supervisors and supervisees follow during and between supervision meetings. Designed to promote the continuous attainment of learning and practice objectives TCS accommodates new models of field instruction addresses common accountability concerns in social work supervision and teaches practitioners how to be self initiating and evaluative. Focusing on the practical implementation of TCS Caspi and Reed have included detailed case vignettes throughout the book that provide concrete examples of putting theory into practice. Both supervisors of interns and staff as well as supervisees will find TCS a helpful tool in the supervisory process.
