## **The English Landscape Past Present And Future:**

Landscape Interfaces Hannes Palang, G. Fry, 2013-06-29 This book has been initiated by the workshop on Cultural heritage in changing landscapes held during the IALE International Association for Landscape Ecology European Conference that started in Stockholm Sweden in June 2001 and continued across the Baltic to Tartu Estonia in July The papers presented at the workshop have been supported by invited contributions that address a wider range of the cultural heritage management issues and research interfaces required to study cultural landscapes The book focuses on landscape interfaces Both the ones we find out there in the landscape and the ones we face while doing research We hope that this book helps if not to make use of these interfaces then at least to map them and bridge some of the gaps between them The editors wish to thank those people helping us to assemble this collection First of all our gratitude goes to the authors who contributed to the book We would like to thank Marc Antrop Mats Widgren Roland Gustavsson Marion Potschin Barbel Tress Tiina Peil Helen Soovali and Anu Printsmann for their quick and helpful advice opinions and comments during the different stages of editing Helen Soovali and Anu Printsmann together with Piret Pungas thank you for technical help Dickens and Landscape Discourse Jane Helen Berard, 2007 Dickens and Landscape Discourse is a contextual study offering valuable insights into the significance of geographical and social placement in nineteenth century literature Jane H Berard considers landscape contexts available to Dickens such as topographical poetry antiquarianism tourism John Britton's Beauties of Wiltshire and the landscape discourse in Dickens other works to open up a reading of Martin Chuzzlewit 1843-44 set in Wiltshire Though Dickens can be seen reflecting or resisting the value laden discourses embedded in his landscapes he communicates to his readers of Martin Chuzzlewit through an interactive oppositional and subversive social discourse to expose a landscape of death and the Victorians struggle for control over their situation Countryside History Ian D. Rotherham, Jennifer A. Moody, 2024-06-18 Like one of the ancient trees he wrote about so elegantly and perceptively Oliver Rackham's roots run deep while his influence branches far He was undoubtedly the leading scholar in landscape history and historical ecology and his work continues to resonate not just with his peers but with a much wider public audience too His combination of extensive archival research meticulous fieldwork and place name analysis were truly ground breaking He not only changed the way we think about the landscape he in fact altered that landscape in turn enriching clarifying bringing it to life This book which honours Rackham's memory is a unique collection of contributions from leading global authorities on countryside and landscape history A number of chapters come from individuals who were his friends and collaborators and they each share a debt to his scholarship and methods Ranging all over Europe from Biaowiec Forest in Poland to the Mediterranean and across the world from New England to northern Japan the wealth of perspectives gathered here makes for a diverse and weighty discussion Collectively the contributions represent an acknowledgment of Rackham's huge impact and influence at the same time as offering a benchmark for current thinking in countryside history worldwide This volume will appeal to

researchers postgraduate students final year undergraduates lecturers and scholars on the one hand but also to anyone who loves the countryside and is fascinated by its complex history As we lose irreplaceable heritage landscapes to climate change and development an understanding of what they are and what they mean only becomes more vital

**Nature** Peter Coates, 2013-04-26 Nature is a deceptively simple and ahistorical term suggesting intrinsic unchanging reality Yet nature has a history too both in terms of human attitudes and human impacts Coates outlines the major understandings of nature in the western world since classical times from nature as higher authority to its more recent meaning of threatened physical space and life forms Unlike many others this book places the history of attitudes to nature within the story of human induced changes in the material environment And few others take a supranational perspective or cross the divides between historical eras A distinctive unifying theme is Coates's interest in how green writers over the last thirty years have interpreted our past dealings with nature specifically their efforts to diagnose the roots of contemporary ecological problems and their search for ancestors He concludes with a discussion of the future of nature in the context of developments such as the new ecology global warming advances in genetic engineering and research on animal behaviour Assuming no previous knowledge Nature provides the reader with an accessible synthesis and introduction to some of environmental history's central features and debates confirming its status as one of the most enthralling current pursuits within historical studies This will be essential reading for second year undergraduates and above in cultural history and environmental history as well as to the general reader interested in environmental issues

Redefining Nature Roy Ellen, Katsuyoshi Fukui, 2021-01-07 How can anthropology improve our understanding of the interrelationship between nature and culture What can anthropology contribute to practical debates which depend on particular definitions of nature such as that concerning sustainable development Humankind has evolved over several million years by living in and utilizing nature and by assimilating it into culture Indeed the technological and cultural advancement of the species has been widely acknowledged to rest upon human domination and control of nature Yet by the 1960s the idea of culture in confrontation with nature was being challenged by science philosophy and the environmental movement Anthropology is increasingly concerned with such issues as they become more urgent for humankind as a whole This important book reviews the current state of the concepts of nature we use both as scientific devices and ideological constructs and is organised around three themes nature as a cultural construction the cultural management of the environment and relations between plants animals and humans

**The English Landscape** Stanley Reginald John Woodell, 1985 This lushly illustrated volume traces the development of the English landscape from the earliest prehistoric times to the present and beyond bringing together the research and views of a group of distinguished scientists and historians

*Interpreting the Landscape* Michael Aston, 2002-09-11 Most places in Britain have had a local history written about them Up until this century these histories have addressed more parochial issues such as the life of the manor rather than explaining the features and changes in the landscape in a factual manner

Much of what is visible today in Britain's landscape is the result of a chain of social and natural processes and can be interpreted through fieldwork as well as from old maps and documents. Michael Aston uses a wide range of source material to study the complex and dynamic history of the countryside, illustrating his points with aerial photographs, maps, plans, and charts. He shows how to understand the surviving remains as well as offering his own explanations for how our landscape has evolved.

The Geographical Magazine, 1986      **The Antiquaries Journal**, 2007      *New Scientist and Science Journal*, 1985-11      Land and Society in Britain, 1700-1914 N. B. Harte, Roland E. Quinault, 1996. Ten essays by scholars who have been influenced by the specialist in the history of British landed society who retired in 1990. The topics include the rivalry between landed and other gentry, the Servants Tax of 1777, attitudes toward foreign farming agricultural laborers and the third Reform Act in Suffolk, the political economy of death duties, the political extremism of Willoughby de Broke and Walter Long, golf and Edwardian politics, and mobility after the horse.
