**Abstract**—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were randomly assigned to a 12-week training program or a control group. The training group performed a 12-week program of aerobic exercise, while the control group remained sedentary. The HR and EE were measured at baseline and at the end of the 12-week program. The results showed that the training group had a significant increase in HR and EE compared to the control group. The increase in HR was 10.5 beats per minute, and the increase in EE was 1,200 kcal per week. The control group showed no significant change in HR and EE. The results suggest that a 12-week training program can improve the cardiovascular fitness and energy expenditure of sedentary, middle-aged women.

When you install your T3, maintenance should consist of, at most, (1) lubrication of the T3 wheel and roller supports (weekly, recommended), (2) if it is used frequently, lubrication of the rollers (at least once a month), and (3) cleaning of the rollers (at least once a month) to remove dirt and debris. For more information on the product, visit our website at [kollmorgen.com](http://kollmorgen.com).

• When you install your T3 within its rated performance region, we strongly recommend that you use the proper mounting technique. Mounting your T3 using the provided mounting hardware may cause difficulties with the product as well as compromise the life of the control system.
