## **Soviet Secret Projects:**

Soviet Secret Projects Tony Buttler, Yefim Gordon, 2004 Among the best selling aviation titles of recent years have been Midland's Lutwaffe and British Secret Projects series Soviet secret projects now come under the spotlight This first volume covers bomber concepts from the various design bureaus from the 1940s onwards Many unusual and sophisticated aircraft are featured in these pages allowing comparisons between what the Soviets were working on and what was being produced in the West during that period

Soviet Secret Projects Tony Buttler, Yefim Gordon, 2005 This is the latest among Midland's very successful Secret Projects series This the second of three volumes covering Soviet secret aviation projects is devoted to post World War II fighters and will include designs from famous bureaus such as Lavochkin Mikoyan Sukhoi Yakovlev Myasishchev and Tupolev The book covers early post war fighters competitions for the first generation supersonic designs MiG 21 and Su 7 9 advanced designs of the 1960s which led to the MiG 2 and competitions to build the specifications which resulted in the MiG 29 Su 27 and MiG I 44 A number of previously unpublished Yakovlev designs from the late 1950s and early 1960s form a separate chapter followed by another covering Yakovlev's VSTOL work The book also describes the competition between design bureaus for orders and shows the progress made in aircraft design behind the Iron Curtain It will give both experts and enthusiasts the chance to compare this work to Western aircraft programs of the era

**Secret Projects** Sabine Lorca, AI, 2025-03-21 Secret Projects uncovers the clandestine history of U S military and scientific advancements revealing the surprising origins of technologies now integral to modern warfare and surveillance Delving into classified endeavors like stealth technology and advanced surveillance programs the book highlights how the Cold War's intense rivalry fueled rapid innovation For instance the development of stealth aircraft such as the F 117 Nighthawk showcases both technological breakthroughs and the complex political considerations driving these secret projects The book argues that these covert initiatives while intended to enhance national security have blurred the lines between defense and surveillance raising critical questions about privacy and accountability Exploring topics such as experimental aircraft and satellite surveillance it provides a fact based account drawing on declassified documents and firsthand accounts to present a balanced perspective The book begins by tracing the historical evolution of key concepts then progresses into specific projects ending with an analysis of their impact on warfare intelligence gathering and civil liberties This approach makes it a valuable resource for anyone interested in military history technology and the hidden forces shaping national security policies

Public-Private Partnerships in Russia Oleg V. Ivanov, Agnieszka O. Inshakova, 2020-11-11 This volume presents the history and current state of the public private partnership PPP sector in Russia It analyzes the legal and institutional framework of PPPs as well as approaches and best practices for public administrations at federal and regional level to promote PPPs Special attention is given to the management of PPP projects in different phases of their life cycle and to the legal and financial structuring of PPP projects In addition the contributions highlight best PPP practices in various sectors

from transport infrastructure to information technology and also discuss international aspects of PPP The volume is aimed at scholars in economics and public administration as well as public decision makers interested in modern trends in the Russian economy and the development of successful business development China's Stealth Fighter Abraham Abrams,2025-01-02

A detailed exploration of China's J 20 stealth fighter its development impact and role in reshaping global power dynamics The United States and Soviet Union began a race to develop the first and most capable fifth generation stealth fighters in the late 1970s The Cold War's end however was followed by both a near total collapse of Russian efforts and major cuts and delays to American programs This provided an opening for a rising and fast modernising Chinese defense industry to kick off its own ambitious program to produce a world leading fighter jet with next generation capabilities Once unveiled the program came to be seen as a herald of China's rising status as a leading player in high tech and major world power Development of the Chengdu J 20 began in the 1990s and has since consistently far exceeded expectations in both its performance and its development timeline The fighter made its first flight in 2011 and began deliveries to the People's Liberation Army Air Force in 2016 a small fraction of the time its American and Russian rivals would take Today it is the world's second most numerous stealth fighter outnumbered only by America's much smaller Lockheed Martin F 35 Lightning II with the two rivals seeing their first of many likely encounters confirmed in March 2022 As the J 20's capabilities have rapidly improved and the rate of production has significantly grown it has very conspicuously played a growing role in patrolling major hotspots in East Asia from Korea and the East China Sea to the Taiwan Strait and disputed South China Sea The J 20 program's success has been the most potent symbol of China's ascent from a minor player in combat aviation during the Cold War to the United States only peer level competitor today It has also set China on a course of pursuing multiple other fighter development efforts including a close competition with America to field the first and most capable sixth generation fighter in the 2030s The J 20 thus marks a major landmark not only in Chinese aviation history but also more broadly in the evolving balance of power between East and West as the country's technological and economic ascents allow it to successfully pursue highly ambitious weapons programs This book takes the J 20's story far back to the formation of the People's Liberation Army Air Force and its trial by fire in the Korean War tracing the rationale for developing a top end air superiority fighter It also compares its performance with rival fifth generation fighter programs in other countries and looks ahead to what the future may hold in this new arms race

Bulletin ,1994 *UFOs and Abductions* David Michael Jacobs,2000 Examining the nature of UFO evidence the authors present a primer for scholars skeptics and others uneasy about investigating the field of UFOs The volume also brings together three bestselling authors David M Jacobs Budd Hopkins and Pulitzer Prize winner John Mack widely known for their

writings on the controversial alien abduction phenomenon     **BattleSpace of Mind** Michael Joseph McCarron,2024-02-29  
The Nazis never surrendered and planned their 4th Reich using neurocognitive weapons Going underground their technology made it's way to South America the Soviet Union the United States among other places We all are bound by the new rules of corporate fascism long planned by Himmler and his main strategy for a 4th Reich financial control Are we all just living in a computer controlled information battlespace continued from World War II This book dissects the matrix of control used by advanced military industrial powers it breaks down the technology bit by bit so you have an understanding how technology is being used in a battle for your mind I address these issues from a veteran's insight as a former Signal Intelligence specialist and with some background in the Intelligence Community I bring forth countermeasures to this control showing you how you can safeguard your mind from these attacks Countermeasures that are not available anywhere in the commercial world yet without them you will be easy prey for these directed targeted pulse modulated attacks first used by the Nazis     *Ideas in the History of Economic Development* Estrella Trincado,Andrés Lazzarini,Denis Melnik,2019-08-05

This edited volume examines the relationship between economic ideas economic policies and development institutions analysing the cases of 11 peripheral countries in Europe Latin America and Asia across the nineteenth and twentieth centuries It sheds light on the obstacles that have prevented the sustained economic growth of these countries and examines the origins of national and regional approaches to development The chapters present a fascinating insight into the ideas and visions in the different locations with the overarching categories of economic nationalism and economic liberalism and how they have influenced development outcomes This book will be valuable reading for advanced students and researchers of development economics the history of economic thought and economic history     *J-20 Mighty Dragon* Abraham

Abrams,2024-12-31 The J 20 fifth generation stealth fighter program has epitomised China's rise from a laggard in combat aviation into a potential world leader J 20 Mighty Dragon Asia's First Stealth Fighter in the Era of China's Military Rise details the J 20's technologies capabilities production timeline design priorities roles evolution and the formations and locations where it has been deployed the ways other countries have responded to it and how the last 30 years of China's industrial and technology sector's modernisation positioned the country to produce what may well now be the world's top air superiority fighter The J 20 program is the most high profile indicator of a turning point in the balance of power between China and the United States and has produced by far the most capable fighter that America or its allies could face in a potential conflict An assessment of the history of Chinese air superiority capabilities and how the Korean War in particular has influenced the country to place a very strong emphasis on the need to field a leading fighter for air to air combat thus provides an important deeper understanding of the program Important context to understanding the J 20's significance and its current global standing is provided by brief assessments of the positions of the Russian and American fighter industries The parallel development of supporting assets from aerial tankers to electronic warfare planes is also explored for a better

understanding of the much transformed Chinese fleet which J 20s are being inducted into The program is also shown to have had a particularly significant influence in the United States ranging from placing discourse on the F 35 s modernisation and on sixth generation fighter development in an entirely new context to stimulating the formation of new counter stealth aggressor training units development of new air to air missiles and the acquisition of E 7 flying radar aircraft among many other responses to the new challenge J 20 Mighty Dragon Asia s First Stealth Fighter in the Era of China s Military Rise is the first volume in the new Technology War series and is extensively illustrated with colour photographs throughout and specially commissioned colour artworks
