## **Space Policy Alternatives:**

*Space Policy Alternatives* Radford Byerly Jr., 2019-06-21 In 1989 I edited a somewhat similar group of essays published by Westview under the title *Space Policy Reconsidered* The preface to that volume began with this statement For some time space policy debate has been too constrained by pre existing assumptions and programs There is also a related need for a community of independent space policy analysts in order to inform those discussions The aim of this book is to take a step toward meeting such needs That statement is repeated here because it is still valid and this book is intended to address the same unmet needs *Policy Options for Improving Educational Access* Mary B. Anderson, 1991 **International Space**

**Policy** Daniel Papp, John McIntyre, 1987 This book brings together experts and analysts in international space policy from academia government and corporations and from the technical and legal spheres It was felt that this broad cross section of expertise would result in the multidimensional and multidisciplinary treatment this complex issue requires This volume provides a valuable mix of perspectives by experts examining the important issues of this new era of space exploration

Naval War College Review Naval War College (U.S.), 1981 Space Policy Alternatives Radford Byerly, 1992-09-09 A collection of essays on American space policy issues After examining existing space programmes and the context in which they exist the contributors suggest alternatives such as NASA's Earth Observing System and manned and unmanned programmes **Challenging the Growth Machine** Barbara Ferman, 1996 Economic development and urban growth are the contested grounds of urban politics Business elites and politicians tend to forge pro growth coalitions centered around downtown development while progressive and neighborhood activists counter with a more balanced approach that features a strong neighborhood component Urban politics is often shaped by this conflict which has intellectual as well as practical dimensions In some cities neighborhood interests have triumphed in others the pro growth agenda has prevailed In this illuminating comparative study Barbara Ferman demonstrates why neighborhood challenges to pro growth politics were much more successful in Pittsburgh than they were in Chicago Operating largely in the civic arena Pittsburgh's neighborhood groups encountered a political culture and institutional structure conducive to empowering neighborhood progressivism in housing and economic development policymaking In contrast the pro growth agenda in Chicago was challenged in the electoral arena which was dominated by machine ward based politicians who regarded any independent neighborhood organizing as a threat Consequently neighborhood demands for policymaking input were usually thwarted Besides revealing why the development policies of two important American cities diverged Ferman's unique comparative approach to this issue significantly expands the scope of urban analysis Among other things it provides the first serious study to incorporate the civic sector neighborhood politics as an important component of urban regimes Ferman also emphasizes institutional and cultural factors often ignored or relegated to residual roles in other studies and expounds on their influence in shaping local politics and policy To add an analytical and normative dimension to urban analysis she focuses on the non

elite actors not just the economic and political elites who compose governing coalitions Ultimately Ferman takes a more holistic and balanced view of large cities than is typical for urban studies as she argues that neighborhoods are an important integral part of what cities are and can be For that reason especially her work will have a profound impact upon our understanding of urban politics
