Scribes of Space Matthew Boyd Goldie, 2019-03-15 Scribes of Space posits that the conception of space the everyday physical areas we perceive and through which we move underwent critical transformations between the thirteenth and fifteenth centuries Matthew Boyd Goldie examines how natural philosophers theologians poets and other thinkers in late medieval Britain altered the ideas about geographical space they inherited from the ancient world In tracing the causes and nature of these developments and how geographical space was consequently understood Goldie focuses on the intersection of medieval science theology and literature deftly bringing a wide range of writings scientific works by Nicole Oresme Jean Buridan the Merton School of Oxford Calculators and Thomas Bradwardine spiritual poetic and travel writings by John Lydgate Robert Henryson Margery Kempe the Mandeville author and Geoffrey Chaucer into conversation This pairing of physics and literature uncovers how the understanding of spatial boundaries locality elevation motion and proximity shifted across time signaling the emergence of a new spatial imagination during this era **A Holistic Story of Space and Time**

David Pearcey , 2023-06-28 Have you ever wondered how the space and time of our everyday lives works and why David Pearcey is here to help with A Holistic Story of Space and Time a thorough exploration through our world of space and time Explaining how space and time works as a complete system the book is helped by brief accounts of the contributions of some of the great scientists and philosophers who helped us understand its components Intended for the general reader who has no previous technical understanding A Holistic Story of Space and Time delves into several areas the types of geometries of space the motion of matter in space and how the force fields of matter pervade space as well as how we perceive space and time by treating the brain as an information management system It shows how the process of perception allows us to determine the true nature of the geometry of the space and time of the real world Much more is also looked into in detail such as Einstein s special and general theories of relativity including his unified field theory electromagnetism and quantum physics including charts and diagrams to explain some of the concepts involved The final part of the book investigates the relationship between us who perceive the real world and the space and time of the real world using the ideas developed by the philosophers Kant and Schopenhauer This all combines to give the reader a uniquely broad look into our world and explains how it works as a total entity from the cosmic world of the curved geometry of general relativity to the mysterious quantum world and then the philosophical aspects of how we are part of it Anyone with an interest in the way things work will be well suited to this extraordinary book that answers the why as well as the what and how Viewpoint and the Fabric of Meaning

 BIG BANG THEORY IN TROUBLE The big bang that is accepted as all but proven fact by the majority of cosmologists other scientists may be in serious trouble Virtually every media article that relates to COSMOLOGY refers to a big bang that happened 10 to 15 billion years ago Those articles occasionally mention technical difficulties concerning the BIG BANG but invariably hasten to explain that those will soon be cleared up Occasional articles appear that point out one or more of those flaws but authors of those are invariably dismissed as misguided big bang bashers This book marks the first significant attempt to gather carefully examine BIG BANG PROBLEMS in a single document Initial chapters introduce relativity particle physics quantum theory as related to current big bang COSMOLOGY Standard theory its many flaws serious questions regarding the proofs of big bang theory are then presented The newer inflationary version of big bang theory is also discussed All of which is done in a manner that is readily understandable by those having a general background in modern science
