wealth and that their deregulation and privatization cannot control the risks that they produce A popular reaction is to focus on the regulation or abolition of derivative finance These authors take a different tack and instead raise the question if we should want access to the wealth that derivatives are capable of producing what kind of social institutions and policies would be needed to make such wealth production work for the benefit of all of us Since this question goes to the very heart of what kind of society is most desirable the volume argues that we need both a social understanding of the derivative and a derivative understanding of the social The derivative reading of the social employs a small set of financial concepts to understand certain defining dimensions of contemporary reality The central concept is that of volatility and its relations to risk uncertainty hedging optionality and arbitrage The social reading of the derivative involves anthropological discussions of the gift ritual play and performativity and provides us with frames of embodiment for analyzing through action and event the ways derivatives do their work
