**The Great Apes** Chris Herzfeld, 2017-11-14 A unique beautifully illustrated exploration of our fascination with our closest primate relatives and the development of primatology as a discipline This insightful work is a compact but wide ranging survey of humankind's relationship to the great apes chimpanzees bonobos gorillas orangutans from antiquity to the present Replete with fascinating historical details and anecdotes it traces twists and turns in our construction of primate knowledge over five hundred years Chris Herzfeld outlines the development of primatology and its key players and events including well known long term field studies notably the pioneering work by women such as Jane Goodall Dian Fossey and Birut Galdikas Herzfeld seeks to heighten our

understanding of great apes and the many ways they are like us The reader will encounter apes living in human families painting apes apes who use American Sign Language and chimpanzees who travelled in space A philosopher and historian specializing in primatology Herzfeld offers thought provoking insights about our perceptions of apes as well as the boundary between human and ape and what it means to be either Great apes and their basic rights Pedro Pozas

Terrados,2020-06-01 The great apes and their basic rights is a call to put in debate the importance of our evolutionary brothers the great apes bonobos chimpanzees gorillas and orangutans all this within the context of the immediate protection of both their populations in the wild as well as their habitat or the liberation of those who are held captives This book is also a request for their basic rights life freedom and to not be tortured physically or psychologically as it is already stated by many scientists and some court rulings that have made headlines worldwide This book coordinated by Pedro Pozas Terrados would not have been possible without the articles written by great scientific figures conservationists animalists people of the legal world journalists and writers They break down preconceptions and support the great apes and their rights with their words thus endorsing the fight in which the Great Ape Project has been working continuously for two decades You will really enjoy reading from Jose Mar a Berm dez de Castro Risue o Jorge Riechmann Emiliano Bruner Birut M F Galdikas Miguel Angel Valladares Isaac Vega Pedro A Ynterian Karen Altamirano M ximo Sand n Fernando Valladares Ros Kepa Tamames Rosa Montero Francisco Garrido Mar a de las Victorias Gonzalez Federico Manuel Rodriguez Carmen M ndez Joaquin Araujo Gaciela Regina Itai Roffman Miguel Galindo and Pedro Pozas **Best Practice Guidelines for Great Ape Tourism**

Elizabeth J. Macfie,Elizabeth A. Williamson,2010 Executive summary Tourism is often proposed 1 as a strategy to fund conservation efforts to protect great apes and their habitats 2 as a way for local communities to participate in and benefit from conservation activities on behalf of great apes or 3 as a business A few very successful sites point to the considerable potential of conservation based great ape tourism but it will not be possible to replicate this success everywhere The number of significant risks to great apes that can arise from tourism require a cautious approach If great ape tourism is not based on sound conservation principles right from the start the odds are that economic objectives will take precedence the consequences of which in all likelihood would be damaging to the well being and eventual survival of the apes and detrimental to the continued preservation of their habitat All great ape species and subspecies are classified as Endangered or Critically Endangered on the IUCN Red List of Threatened Species IUCN 2010 therefore it is imperative that great ape tourism adhere to the best practice guidelines in this document The guiding principles of best practice in great ape tourism are Tourism is not a panacea for great ape conservation or revenue generation Tourism can enhance long term support for the conservation of great apes and their habitat Conservation comes first it must be the primary goal at any great ape site and tourism can be a tool to help fund it Great ape tourism should only be developed if the anticipated conservation benefits as identified in impact studies significantly outweigh the risks Enhanced conservation investment and action at great ape

tourism sites must be sustained in perpetuity Great ape tourism management must be based on sound and objective science Benefits and profit for communities adjacent to great ape habitat should be maximised Profit to private sector partners and others who earn income associated with tourism is also important but should not be the driving force for great ape tourism development or expansion Comprehensive understanding of potential impacts must guide tourism development positive impacts from tourism must be maximised and negative impacts must be avoided or if inevitable better understood and mitigated The ultimate success or failure of great ape tourism can lie in variables that may not be obvious to policymakers who base their decisions primarily on earning revenue for struggling conservation programmes However a number of biological geographical economic and global factors can affect a site so as to render ape tourism ill advised or unsustainable This can be due for example to the failure of the tourism market for a particular site to provide revenue sufficient to cover the development and operating costs or it can result from failure to protect the target great apes from the large number of significant negative aspects inherent in tourism Either of these failures will have serious consequences for the great ape population Once apes are habituated to human observers they are at increased risk from poaching and other forms of conflict with humans They must be protected in perpetuity even if tourism fails or ceases for any reason Great ape tourism should not be developed without conducting critical feasibility analyses to ensure there is sufficient potential for success Strict attention must be paid to the design of the enterprise its implementation and continual management capacity in a manner that avoids or at least minimises the negative impacts of tourism on local communities and on the apes themselves Monitoring programmes to track costs and impacts as well as benefits is essential to inform management on how to optimise tourism for conservation benefits These guidelines have been developed for both existing and potential great ape tourism sites that wish to improve the degree to which their programme contributes to the conservation rather than the exploitation of great apes

McGrew, Linda F. Marchant, Toshisada Nishida, 1996-07-28 The great apes chimpanzees bonobos gorillas and orangutans are our closest living relatives sharing a common ancestor only five million years ago We also share key features such as high intelligence omnivorous diets prolonged child rearing and rich social lives The great apes show a surprising diversity of adaptations particularly in social life ranging from the solitary life of orangutans through patriarchy in gorillas to complex but different social organisations in bonobos and chimpanzees As great apes are so close to humans comparisons yield essential knowledge for modelling human evolutionary origins Great Ape Societies provides comprehensive up to date syntheses of work on all four species drawing on decades of international field work zoo and laboratory studies It will be essential reading for students and researchers in primatology anthropology psychology and human evolution *The Great Apes* Robert Gray, 1969 Explains briefly the evolutionary process of man and ape from a

Beck,Tara S. Stoinski,Michael Hutchins,Terry L. Maple,Bryan Norton,2014-05-27 The great apes gorillas chimpanzees bonobos and orangutans are known to be our closest living relatives Chimpanzees in particular share 98 percent of our DNA and scientists widely agree that they exhibit intellectual abilities long thought to be unique to humans such as self awareness and the ability to interpret the moods and identify the needs of others The close relation of apes to humans raises important ethical questions Are they better protected in the wild or in zoos Should they be used in biomedical research Should they be afforded the same legal protections as humans *Great Apes and Humans* is the first book to present a spectrum of viewpoints on human responsibilities toward great apes A variety of field biologists academic scientists zoo professionals psychologists sociologists ethicists and legal scholars consider apes in both the wild and captivity They present sobering statistics on the declining numbers of wild apes specifically discussing the decimation of great ape populations due to wild game consumption They explore the role of apes in the educational missions of zoos as well as the need for sanctuaries for wild ape orphans and former research subjects After examining the social division between apes and humans from historical evolutionary and cognitive perspectives they conclude by reviewing the current moral and legal status of great apes as well as how apes cognitive skills inform these issues Although this provocative book contains many different opinions the uniting concern of the contributors is the safety and well being of great apes Only by continuing the dialogue so clearly presented here can we hope to ensure their future The Gentleman's Magazine ,1877 The Great Apes Jennifer Lindsey,1999 Studies the similarities and differences between different species of apes and discusses how apes and humans are alike **Great Apes** Geoffrey C.
