**Top 100 Food Plants** Ernest Small, 2009 This beautifully illustrated book reviews scientific and technological information about the world's major food plants and their culinary uses. An introductory chapter discusses nutritional and other fundamental scientific aspects of plant foods. The 100 main chapters deal with a particular species or group of species. All categories of food plants are covered, including cereals, oilseeds, fruits, nuts, vegetables, legumes, herbs, spices, beverage plants, and sources of industrial food extracts. Information is provided on scientific and common names, appearance, history, economic and social importance, food uses, including practical information on storage and preparation, as well as notable curiosities. There are more than 3000 literature citations in the book and the text is complemented by over 250 exquisitely drawn illustrations. Given the current alarming rise in food costs and increasing risk of hunger in many regions, specialists in diverse fields will find this reference work to be especially useful. As well, those familiar with Dr. Small's books or those with an interest in gardening, cooking, and human health in relation to diet will want to own a copy of this book. Publisher's web site.

**Food and World Culture** Linda S. Watts, Kelty Clark-Mahoney, 2022-08-23 This book

uses food as a lens through which to explore important matters of society and culture. Whether because of its necessity pleasure or ubiquity the world of food and its lore proves endlessly fascinating to most people. The story of food is a narrative filled with both human striving and human suffering. However many of today's diners are only dimly aware of the human price exacted for that comforting distance from the lived world realities of food justice struggles. With attention to food issues ranging from local farming practices to global supply chains this book examines how food's history and geography remain inextricably linked to sociopolitical experiences of trauma connected with globalization such as colonization conquest enslavement and oppression. The main text is structured alphabetically around a set of 70 ingredients from almonds to yeast. Each ingredient's story is accompanied by recipes. Along with the food profiles the encyclopedia features sidebars. These are short discussions of topics of interest related to food including automats diners victory gardens and food at world's fairs.
