frozen poison gassed smothered and pelted by asteroids In *The Ends of the World* Peter Brannen dives into deep time exploring Earth's past dead ends and in the process offers us a glimpse of our possible future Many scientists now believe that the climate shifts of the twenty first century have analogs in these five extinctions Using the visible clues these devastations have left behind in the fossil record *The Ends of the World* takes us inside scenes of the crime from South Africa to the New York Palisades to tell the story of each extinction Brannen examines the fossil record which is rife with creatures like dragonflies the size of sea gulls and guillotine mouthed fish and introduces us to the researchers on the front lines who using the forensic tools of modern science are piecing together what really happened at the crime scenes of the Earth's biggest whodunits Part road trip part history and part cautionary tale *The Ends of the World* takes us on a tour of the ways that our planet has clawed itself back from the grave and casts our future in a completely new light **British Book News** British Council,1983 Includes no 53a British wartime books for young people **The Gospel Truth** ,1977 **The Rise of Birds** Sankar Chatterjee,2015-04 His compelling occasionally controversial revelations accompanied by spectacular illustrations are a must read for anyone with a serious interest in the evolution of the feathered dinosaurs from vertebrate paleontologists and ornithologists to naturalists and birders **Turning to Stone** Marcia Bjornerud,2024-08-13 Winner of the 2025 John Burroughs Medal for Natural History Writing A beautiful book at once intimate and sweeping informative and moving Elizabeth Kolbert author of *Under a White Sky* Earth is vibrantly alive and full of wisdom for those who learn to listen Earth has been reinventing itself for more than four billion years keeping a record of its experiments in the form of rocks Yet most of us live our lives on the planet with no idea of its extraordinary history unable to interpret the language of the rocks that surround us Geologist Marcia Bjornerud believes that our lives can be enriched by understanding our heritage on this old and creative planet Contrary to their reputation rocks have eventful lives and they intersect with our own in surprising ways In *Turning to Stone* Bjornerud reveals how rocks are the hidden infrastructure that keep the planet functioning from sandstone aquifers purifying the water we drink to basalt formations slowly regulating global climate Bjornerud's life as a geologist has coincided with an extraordinary period of discovery in the geosciences From an insular girlhood in rural Wisconsin she found her way to an unlikely career studying mountains in remote parts of the world and witnessed the emergence of a new understanding of the Earth as an animate system of rock air water and life We are all most fundamentally Earthlings and we can find existential meaning and enduring wisdom in stone **The Prehistoric Earth** Thom Holmes,2008 *Biology, the World of Life* Robert A.
