**Fishing the Great Lakes** Margaret Beattie Bogue,2001-06-28 Fishing the Great Lakes is a sweeping history of the destruction of the once abundant fisheries of the great inland seas that lie between the United States and Canada Though lake trout whitefish freshwater herring and sturgeon were still teeming as late as 1850 Margaret Bogue documents here how overfishing pollution political squabbling poor public policies and commercial exploitation combined to damage the fish populations even before the voracious sea lamprey invaded the lakes and decimated the lake trout population in the 1940s From the earliest records of fishing by native peoples through the era of European exploration and settlement to the growth and collapse of the commercial fishing industry Fishing the Great Lakes traces the changing relationships between the fish resources and the people of the Great Lakes region Bogue focuses in particular on the period from 1783 when Great Britain and the United States first politically severed the geographic unity of the Great Lakes through 1933 when the commercial fishing industry had passed from its heyday in the late nineteenth century into very serious decline She shows how fishermen entrepreneurial fish dealers the monopolistic A Booth and Company which distributed and marketed much of the Great Lakes catch and policy makers at all levels of government played their parts in the debacle So too did underfunded scientists and early conservationists unable to spark the interest of an indifferent public Concern with the quality of lake habitat and the abundance of fish increasingly took a backseat to the interests of agriculture lumbering mining commerce manufacturing and urban development in the Great Lakes region Offering more than a regional history Bogue also places the problems of Great Lakes fishing in the context of past and current worldwide fishery concerns

**Sustainability Issues for Resource Managers** Daniel L. Bottom,Gordon H. Reeves,Martha H. Brookes,1997-08 This series of essays examines the underlying historical cultural and philosophical issues that undermine the sustainability of natural resources and proposes alternative approaches to conservation These approaches emphasize the relations among populations rather than among individuals the integrity of the whole ecosystems across longer time frames the importance of qualitative as well as quantitative indicators of human welfare and sustainability and the unpredictable and interdependent interaction among

natural scientific and regulatory processes Charts and tables      Defining Sustainability Richard B. Howarth, 2010-03-01 The rising stature of sustainable development constitutes an important and evolving challenge for natural resource and environmental economics Is sustainability best achieved through the use and extension of conventional criteria for optimal resource allocation Or does the concept involve a more substantial shift beyond methods such as present value maximization and nonmarket valuation At the heart of this challenge lie questions concerning the precise meaning that should be attached to the phrase sustainable development and how this concept may be operationalized in economic theory and applied policy analysis      **Social Sciences in Forestry**, 1985      **Ecology of a Managed Terrestrial Landscape** Ajith H. Perera, David L. Euler, Ian D. Thompson, 2011-11-01 The growing popularity of the broad landscape scale approach to forest management represents a dramatic shift from the traditional stand based focus on timber production Ecology of a Managed Terrestrial Landscape responds to the increasing need of forest policy developers planners and managers for an integrated comprehensive perspective on ecological landscapes The book examines the big picture of ecological patterns and processes through a case study of the vast managed forest region in Ontario The contributors synthesize current landscape ecological knowledge of this area and look at gaps and future research directions from several points of view spatial patterns ecological functions and processes natural disturbances and ecological responses to disturbance They also discuss the integration of landscape ecological knowledge into policies of forest management policies particularly with respect to Ontario's legislative goals of forest sustainability Ecology of a Managed Terrestrial Landscape is the first book to describe the landscape ecology of a continuously forested landscape in a comprehensive manner It is written for instructors and students in forest management wildlife ecology and landscape ecology and for forest managers planners and policy developers in North America      **Michigan History Magazine** George Newman Fuller, Lewis Beeson, 1983      An Empire in Waiting Mark Davis, 1997      *The Old Northwest*, 1990 A journal of regional life and letters      *Environmental Geology Notes*, 1989

**Bushworkers and Bosses** Ian Walter Radforth, 1987 The lumberjack freewheeling transient independent is the stuff of countless Canadian tales and legends He is also something of a dinosaur a creature of the past replaced by a unionized worker in a highly mechanized and closely managed industry In this far ranging study of the logging industry in twentieth century Ontario Ian Radforth charts the course of its transition and the response of its workers to the changes Among the factors he considers are technological development changes in demography and the labour market an emerging labour movement new managerial strategies the growth of a consumer society and rising standards of living Radforth has drawn on an impressive array of sources including interviews and forestry student reports as well as a vast body of published sources such as The Labour Gazette The Pulp and Paper Magazine of Canada and The Canada Lumberman to shed new light on trade union organization and on the role of ethnic groups in the woods work force The result is a richly detailed analysis of life on

the job for logging workers during a period that saw the modernization not only of the work but of relations between the workers and the bosses from first page      **The American Midland Naturalist** ,1998 A refereed broad spectrum journal publishing basic research in diverse disciplines in biology and varied taxa      **Road Density and Landscape Pattern in Northern Wisconsin, USA; Present and Past Perspectives on Environmental Constraints and Social Drivers** Todd J.
