Blouet, Frederick C. Luebke,1979 This classic description of the interaction between the vast central plains of America and the people who lived there has been one of the most influential widely known and controversial works in western history      **Symposium on the Great Plains of North America** Carle C. Zimmerman, Seth Russell,1967      **The Great Plains** Walter Prescott Webb,1959-01-01 A study of the changes initiated into the systems and culture of the plain dwellers      Interpretations of Calamity K. Hewitt,2019-09-18 Originally published in 1983 Interpretations of Calamity provides a provocative critique of the dominant view of research into natural hazards Throughout the world there are now many people professionally engaged in the mitigation and control of risks hazards and the impact of continuing economic development will ensure that they are fully employed There is a wealth of perspectives in the book including weather and wheat yields in the Soviet Union and Canada an historical view of underdevelopment and hazards in Ireland and the impact of a response to drought in southern Africa the Sahel and the Great Plains of the USA The book reflects the major themes of hazards in the context of economic development and social change Most of the case studies are from the rural and agriculture scene This book provides a unique view of the vital importance of food production and of the considerable and sometimes calamitous impact that frost flood storm and drought have on the wellbeing of millions of people and on the stability of the international economic system      Cenozoic Tectonics and Regional Geophysics of the Western Cordillera Robert Baer Smith, Gordon P. Eaton,1978-06-01      Perceptions of Marginality Heikki Jussila, Walter Leimgruber, Roser Majoral,2019-07-09 First published in 1998 this volume takes an international approach theoretical and regional perceptions and experiences of marginality along with some key case studies in Arctic North America Greenland Aboriginal Australia and the Republic of Ireland Its contributors are geographers from all over the world It is part of a series which aims to publish new scientific work on the dynamism of the marginal and critical regions of the world and concentrates on understanding marginality and its processes the human process and its agents comparative approaches and different policy responses to economic social and environmental problems along with studying the human response to global change and its implications for marginalization      *Many Wests* David M. Wrobel, Michael C. Steiner,1997 What does it mean to live in the West today Do people tend to identify with states with regions or with the larger West This book examines the development of regional identity in the American West demonstrating that it is a regionally diverse entity made up of many different wests Great Plains Southwest Rocky Mountains and more in which American regionalism finds its fullest expression These fourteen

original essays tell how a sense of place emerged among residents of various regions and how a sense of those places was developed by people outside of them Wrobel and Steiner first offer a compelling overview of the West's regional nature then thirteen other rising or renowned scholars from history American Studies geography and literature tell how regional consciousness formed among inhabitants of particular regions All of the essays address the larger issue of the centrality of place in determining social and cultural forms and individual and collective identities Some focus on race and culture as the primary influences on regional consciousness while others emphasize environmental and economic factors or the influence of literature Some even examine western regionalism in areas that lie beyond the West as it has traditionally been conceived Each of the contributors believes that where a people live helps determine what they are and they write not only about the many wests within the larger West but also about the constant state of flux in which regionalism exists Many books speak of the West as a place but few others deal with the West's different places Many Wests presents a vision of the West that reflects both the common heritage and unique character of each major subregion building on the revisionist impulse of the last decade to help redirect New Western History toward an appreciation of regional diversity and integrate scholarship in the regional subfields It is a book for everyone who lives in studies or loves the West for it confirms that it is home to very different peoples economies histories and regions

**Great Plains Quarterly**, 2008    **Ghost Settlement on the Prairie**

Joseph V. Hickey, 1995 Four miles southeast of the village of Matfield Green in Chase County Kansas the heart of the Flint Hills lies the abandoned settlement of Thurman At the turn of the century Thurman was a prosperous farming and ranching settlement with fifty one households a post office two general stores a blacksmith shop five schools and a church Today only the ruins of Thurman remain Joseph Hickey uses Thurman to explore the settlement form of social organization which along with the village hamlet and small town was a dominant feature of nineteenth and early twentieth century American life He traces Thurman's birth in 1874 its shallow rises and falls and its demise in 1944 Akin to what William Least Heat Moon did for Chase County in PrairyErth Hicky provides a deep map for one post office community and consequently tells us a great deal about America's rural past Describing the shifting relationships between Thurmanites and their Matfield Green neighbors Hickey details how social forces set in motion by the American ideal of individualism and the machinations of capitalist entrepreneurs produced a Darwinian struggle between Thurman stock raisers and Flint Hills cattle barons that ultimately doomed Thurman Central to the story are the concept of ordinary entrepreneurship and the profoundly capitalist attitudes of the farmers who settled Thurman and thousands of other communities dotting the American landscape Hickey's account of Thurman's social organization and disintegration provides a new perspective on what happened when the cattle drives from Texas and the Southwest shifted in the 1880s from the Kansas cowtowns to the Flint Hills Moreover he punctures numerous myths about the Flint Hills including those that cattle dominated because the land is too rocky to farm or that Indians refused to farm because of traditional beliefs Like many other small rural communities Hickey argues Thurman

during its seventy year history was actually several different settlements A product of changing social conditions each one resulted from shifting memberships and boundaries that reflected the efforts of local entrepreneurs to use country schools churches and other forms of social capital to gain advantages over their competitors In the end Thurman succumbed to the impact of agribusiness which had the effect of transforming social capital from an asset into a liability Ultimately Hickey shows the settlement s fate echoed the decline of rural community throughout America    *Catalogue* Harvard University.

**American West in the Twenty-First Century** Brenden W. Rensink,2022-11 In 1893 Frederick Jackson Turner famously argued that the generational process of meeting and conquering the supposedly uncivilized western frontier is what forged American identity In the late twentieth century new western historians dissected the mythologized western histories that Turner and others had long used to embody American triumph and progress While Turner s frontier is no more the West continues to present America with challenging processes to wrestle navigate and overcome The North American West in the Twenty First Century edited by Brenden W Rensink takes stories of the late twentieth century modern West and carefully pulls them toward the present explicitly tracing continuity with or unexpected divergence from trajectories established in the 1980s and 1990s Considering a broad range of topics including environment Indigenous peoples geography migration and politics these essays straddle multiple modern frontiers not least of which is the temporal frontier between our unsettled past and uncertain future These forays into the twenty first century West will inspire more scholars to pull histories to the present and by doing so reinsert scholarly findings into contemporary public awareness    Transactions of the ...
