**A Miracle in Stone: The Great Pyramid of Egypt** Joseph A. Seiss, This book is meant to give a succinct comprehensive account of the oldest and greatest existing monument of intellectual man particularly of the recent discoveries and claims with regard to it If the half that learned and scientific investigators allege respecting the Great Pyramid of Gizeh be true it is one of the most interesting objects on earth and ought to command universal attention It has been unhesitatingly pronounced and perhaps it is the most important discovery made in our day and generation Simply as an architectural achievement this mysterious pillar from the time of Alexander the Great has held its place at the head of the list of The Seven Wonders of the World But under the researches and studies of mathematicians astronomers Egyptologists and divines it has of late been made to assume a character vastly more remarkable Facts and coincidences so numerous and extraordinary have been evolved that some of the most sober and philosophic minds have been startled by them It would verily seem as if it were about to prove itself a sort of key to the universe a symbol of the profoundest truths of science of religion and of all the past and future history of man So at least many competent persons have been led to regard it after the most thorough sifting which the appliances of modern science and intelligence have been able to give it Particularly in Scotland England and France has the subject elicited much earnest interest Quite a number of works and treatises most of them voluminous costly and learned have been devoted to it and not without a marked and serious impression St John Vincent Day Fellow of the Royal Scottish Society of Arts member of sundry institutions of Engineers and honorable librarian of the Philosophical Society of Glasgow says A former published work on the subject besides one or two papers in the transactions of a scientific Society have of necessity brought me into contact with every shade of opinion as to the various theories respecting the Pyramid and the facts belonging to it I have thus been enabled both by verbal and written discussions and arguments to ascertain the weight of evidence on which theories assertions contradictions and alleged facts have been supported and I can only state that in those cases where the Pyramid subject has been examined into with a diligent spirit of inquiry that is with the aim of not merely strengthening preconceived notions or prejudices but to evolve absolute realities I have not yet met any one but who is more or less convinced by the modern theory Preface to Papers on the Great Pyramid 1870 In this country the publications on the subject have been very circumscribed A few tracts short papers review articles or incidental discussions in connection with other subjects is about all that has thus far appeared from the American press And as the European books are mostly large expensive and not readily accessible comparatively few among us have had the opportunity of learning what has developed in this interesting field A just r sum of the matter of moderate length and price in plain and easy form would seem to be needed and specially in place In the absence of anything of the sort and with a view to what might in measure supply the want the preparation of the following Lectures was undertaken How far the effort has succeeded the candid reader will determine It

has at least been honest Persuaded of the varied worth of the subject the author has endeavored to be accurate in his presentations and as thorough as the space would allow For his data concerning the Pyramid he has been obliged to rely on the original works of explorers to which due reference is given Though in Egypt in the latter part of 1864 with a view to some personal examinations a severe sickness contracted in Syria and Palestine prevented him from accomplishing the purpose for which he visited the land of the Pharaohs But his interest did not therefore abate In 1869 he gave out a small publication on the Great Pyramid and having tried to master and digest what has thus far been adduced by others he now ventures a larger exhibition of the case as it presents itself to him The intricacies of mathematics and astronomy so deeply involved in these pyramid investigations he has intentionally avoided seeking rather to explain for the many than to demonstrate for the few He has confined himself mostly to descriptions and statements of results which he has sought to give in a way which all readers of average intelligence can readily follow and understand **A Miracle in Stone** Joseph Augustus Seiss,2018-12-18

*A Miracle in Stone* Joseph Seiss, 2018-11-17 *A Miracle in Stone* comprises three lectures on the nature and origins of the Great Pyramid of Giza in Egypt. Notable for serving as an overview of archaeological and spiritual investigation of the Great Pyramid as it stood in the 1870s, this book discusses the Egyptian pyramids in a manner which considers their origins and construction methods. After describing both the interior and exterior of the structures, Joseph Augustus Seiss embarks on a series of speculations consistent with his lifelong interest in pyramidology. The one large diagram which follows the preface of the work serves as a useful reference point for readers. This, in itself, is an accurate rendition of the great pyramid's structure and interior, including the passageway and tomb at its center. Each aspect of the drawing has a corresponding letter, with the smaller pyramids of Giza also appearing. The mystery behind how Giza's pyramids were built invited much speculation with the pyramidology movement rapidly growing in the late 19th century. The idea that God or a divine spiritual force had either singlehandedly made or contributed to the construction of the great pyramids was popular. For his part, Seiss considers the pyramid to be a great altar to the divine.

*The Great Pyramid* Joseph Augustus Seiss, 1976 This book discusses the Great Pyramid in Giza, including its measurements, its religious significance, and the cultural importance of the structure.
