The Green Factor In German Politics:

The Green Factor In German Politics Gerd Langguth, 2019-07-11 The Green Party evolved out of a number of protest movements of the late 1960s and 1970s and became a major political factor in the Federal Republic of Germany in 1983 when it drew enough votes to send twenty seven members to the Bundestag The author follows the party's rise from new social and ecological groups to its current place in the Federal parliament and provincial legislatures He addresses the questions raised by Green Party members and by the unrest they have engendered whether they believe in parliamentary democracy what effect their policy of replacing delegates in parliament at midsession will have on the parliament and the party and how they relate to Germany's traditional political parties The answers to these and other questions form the background for an appraisal of the Green party in which the author traces the development of its role from a political irritant to a factor of serious influence

Germany in the Twentieth Century (RLE: German Politics) David Childs, 2014-12-17 The book traces the development of Germany from the Kaiser's Reich in the 1870s to the reunited democratic state led by Helmut Kohl in the 1990s The author begins by countering the popular view of Germany before 1914 as irredeemably reactionary and after assessing Germany's part in the First World War he outlines the rise and fall of the Weimar Republic The 12 years of Hitler's destructive experiment are presented in a balanced way as part of the overall development of the country Germany in defeat is then discussed as is her rebirth under Four Power occupation The last chapters explore the two separate German states and the events leading up to the restoration of German unity
