*Music Video and Transcultural Imaginaries* Kathrin Dreckmann, Christofer Jost, Bastian Schramm, 2025 From their inception music videos have served as an important instrument for depicting collective emotional states cultural affiliations and processes of social change At the beginning of the 21st century the utilization of the music video genre changed with more and more artists using it to address social and political grievances as well as questions of identity Both the decline of music television as a gatekeeper limiting access and participation as well as the rise of social media have contributed significantly to the growth of the critical and subversive but also utopian potential of music videos As a result music videos today offer counter proposals to heteronormativity ableism patriarchalism racism and other forms of oppression that not only reach a wider audience but also reflect a broader diversity of lifestyles interests and motivations than was possible during the MTV era This volume explores transcultural imaginaries in music videos from a variety of angles providing a broad overview of approaches to negotiating the cultural in the music video genre both past and present

*Designing the Music Business* Guy Morrow, 2020-06-10 This book addresses the neglect of visual creativities and content and how these are commercialised in the music industries While musical and visual creativities drive growth there is a lack of literature relating to the visual side of the music business which is significant given that the production of meaning and value within this business occurs across a number of textual sites Popular music is a multimedia discursive fluid and expansive cultural form that in addition to the music itself includes album covers gig and tour posters music videos set stage and lighting designs live concert footage websites virtual reality augmented reality technologies merchandise designs and other forms of visual content As a result it has become impossible to understand the meaning and value of music without

considering its relation to these visual components and to the interrelationships between them Using design culture theory participant observation interviews case studies and a visual methodology to explore the topic this research based book is a valuable study aid for undergraduate and postgraduate students of subjects including the music business design arts management creative and cultural industries studies business and management studies and media and communications
