**Rethinking Your Teenager** Darby Fox, 2020-01-15 The teenage years parents fear this stage dreading it even while watching their adorable toddlers explore the world When it arrives they try to control their teenager in turn causing their teenager to push back more intensely It's a natural instinct on both sides teenagers are changing in every way while trying to assert their independence and parents are faced with the challenge of

coming up with rules expectations and standards for behavior without a genuine understanding of what is happening But the result of this pattern is a parent child relationship defined by conflict and reactivity a breeding ground for stress anger and anxiety all of which reinforcing those same cultural stereotypes and worst fears But it doesn't have to be this way In this book family therapist Darby Fox challenges parents to redefine the goals of adolescence by reorienting their focus from what they want their child to be to on who they want their child to be Darby not only equips parents with the insight to understand the changes taking place in their child's brain and body and support their adolescent's bid for independence but also offers an approach that allows parents to engage their adolescent in a relationship instead of struggling in an endless battle for control The book is organized around a series of persistent myths about adolescence each of which the author tears down with a combination of cutting edge neuroscience research developmental psychology and her own mix of clinical observations and experience raising four children Darby offers a new model for the parent child relationship encouraging parents to let go of the attempt to control their teenager and focus instead on creating mutual respect providing structure and nurture and encouraging independence in their developing teenager She walks through the keys to combining structure and nurture and teaches parents how to connect with their teen while holding them accountable for their behavior If parents approach teen years with the same thoughtful preparation sense of awe and wonder and responsibility that they do the early childhood years it can be an enjoyable and rewarding developmental stage that deepens rather than damages parent child relationships
