

These data demonstrate a clear relationship between the number of years of experience and the number of publications. The number of publications increases with the number of years of experience, and the relationship is non-linear. The number of publications increases rapidly in the first few years of experience and then levels off. The number of publications is highest for those with 10-15 years of experience and lowest for those with 0-5 years of experience.

and a comprehensive understanding of the factors that influence the effectiveness of the intervention. The authors also discuss the importance of ongoing evaluation and monitoring of the intervention's impact on the community, and the need for a multi-sectoral approach to address the complex nature of the problem.
