to food safety management Conclusions and recommendations include adopting a risk based decision making approach to food safety creating a data surveillance and research infrastructure integrating federal state and local government food safety programs enhancing efficiency of inspections and more Although food safety is the responsibility of everyone from producers to consumers the FDA and other regulatory agencies have an essential role In many instances the FDA must carry out this responsibility against a backdrop of multiple stakeholder interests inadequate resources and competing priorities Of interest to the food production industry consumer advocacy groups health care professionals and others Enhancing Food Safety provides the FDA and Congress with a course of action that will enable the agency to become more efficient and effective in carrying out its food safety mission in a rapidly changing world **Code of Federal Regulations**,1987 Special edition of the Federal Register containing a codification of documents of general applicability and future effect with ancillaries
