The Green City:

The Green City Nicholas Low, 2005 A team of city building professionals explain in straightforward terms how the idea of ecological sustainability can be embodied in the everyday life of homes communities and cities to make a better future The book considers and answers three questions What does the global agenda of sustainable development mean for the urban spaces where most people live work and move Can we keep what we love about suburban life and still save the environment And what new methods of planning and building will be needed in the 21st century Rejecting both economic and environmental orthodoxy the book s essential message is that the sustainable city can be built by a thousand well directed small changes It draws on practical case material from around the world and weaves together four critical aspects of urban life housing open space workplaces and transport A photographic essay of 32 colour plates illustrates the ideas discussed

The Green City and Social Injustice Isabelle Anguelovski, James J. T. Connolly, 2021-11-29 The Green City and Social Injustice examines the recent urban environmental trajectory of 21 cities in Europe and North America over a 20 year period It analyses the circumstances under which greening interventions can create a new set of inequalities for socially vulnerable residents while also failing to eliminate other environmental risks and impacts Based on fieldwork in ten countries and on the analysis of core planning policy and activist documents and data the book offers a critical view of the growing green planning orthodoxy in the Global North It highlights the entanglements of this tenet with neoliberal municipal policies including budget cuts for community initiatives long term green spaces and housing for the most fragile residents and the focus on large scale urban redevelopment and high end real estate investment It also discusses hopeful experiences from cities where urban greening has long been accompanied by social equity policies or managed by community groups organizing around environmental justice goals and strategies The book examines how displacement and gentrification in the context of greening are not only physical but also socio cultural creating new forms of social erasure and trauma for vulnerable residents Its breadth and diversity allow students scholars and researchers to debunk the often depoliticized branding and selling of green cities and reinsert core equity and justice issues into green city planning a much needed perspective Building from this critical view the book also shows how cities that prioritize equity in green access in secure housing and in bold social policies can achieve both environmental and social gains for all
