Education Reimagined: The Impact of Advanced Technologies on Learning

Mohammad Khalil, Mohammed Saqr, Sonsoles López-Pernas, Isabel Hilliger, 2024-12-18 The last decade has seen significant progress in technology particularly in the fields of Artificial Intelligence and machine learning which have had a profound impact on numerous industries including education. The integration of technology in education has fundamentally altered the landscape of learning where data becomes a crucial component to provide insights into for example how students learn when and where additional support is needed. Employing educational data is proving to be a catalyst for innovation in education opening up new possibilities for students and educators alike. The focus of this Research Topic is to explore the impact of recent technological innovations and advances such as AI, AI powered Chatbots, Learning Analytics, Virtual and Augmented Reality, and remote and virtual labs on different education systems both from the educational and the psychological perspective. The scope is twofold on the one hand examining the use of these advanced technologies in learning and teaching activities and on the other hand teaching students about these technologies and understanding the impact of including them in new education policies and curricula including teaching of AI, data science, analytics, and the ethical implications of data. The Research Topic seeks to provide insightful and thought provoking perspectives on how technology is being utilized to enhance the learning experience for students of all ages. Both in higher education and K12 education and their transition to higher education. By gathering experts in psychology, education, and technology this Research Topic aims to present research findings and best practices and to stimulate discussions on the role of technology in shaping the future of education. The ultimate objective is to inspire innovation and to improve the education of future generations through advanced technologies

Advances in Modern Mental Chronometry

José M Medina, Willy Wong, José A Díaz, Hans Colonius, 2015-05-19 Mental chronometry encompasses all aspects of time processing in the nervous system and constitutes a standard tool in many disciplines including theoretical and experimental psychology and human neuroscience. Mental chronometry has represented a fundamental approach to elucidate the time course of many cognitive phenomena and their underlying neural circuits over more than a century. Nowadays mental chronometry continues evolving and expanding our knowledge and our understanding of the temporal organization of the brain in combination with different neuroscience techniques and advanced methods in mathematical analysis. In research on mental chronometry human reaction times play a central role. Together with reaction times other topics in mental chronometry include vocal, manual and saccadic

latencies subjective time psychological time interval timing time perception internal clock time production time representation time discrimination time illusion temporal summation temporal integration temporal judgment redundant signals effect perceptual decision and motor time etc The aim of this research topic is to provide an overview of the state of the art in this field its relevance recent findings current challenges perspectives and future directions Thus as a result a collection of 14 original research and opinion papers from different experts have been gathered together in a single volume We hope this research topic will provide a useful framework and an up to date set of papers for further discussion on mental chronometry within the human brain We are grateful to all the referees for their valuable support effort and time during the creation of the research topic Granada April 2015 Jos M Medina Willy Wong Jos A Diaz Hans Colonius

Connecting People to Their Oceans: Issues and Options for Effective Ocean Literacy

Angel Borja,Francesca Santoro,Gail Scowcroft,Stephen Fletcher,Pierre Strosser,2020-03-25 While there is growing evidence of the importance of marine ecosystems for our societies evidence shows also that pressures from human activities on these ecosystems are increasing putting the health of marine ecosystems at stake worldwide Hence Blue Economy is becoming an important component of future socio economic development strategies e g this is called Blue Growth in Europe that eventually can result in increasing pressures at sea and despite the current regulatory framework in particular with the Oceans Act in USA or Canada and the Marine Strategy Framework Directive in Europe it is likely that this situation will continue in the future Ensuring all those connected to the sea directly or indirectly gain a better understanding of the importance of the seas the human sea interactions and opportunities to act better and reduce impacts from human pressures is central to Ocean Literacy OL Receiving increasing attention in Europe and USA OL is a challenge for all parts of society educators 2 the role OL could play in interaction with innovation regulation economic incentive social norms to support human capital development as key component of sustainable growth and 3 pre conditions for effective OL for different sectors and target groups Questions relevant to OL include Which knowledge produced by whom to share and how Who to target and how to effectively reach those targeted How to design OL initiatives including by mobilizing those targeted via living lab approaches e g to ensure effective OL and pave the way for behavior change What are the knowledge gaps that limit our capacity to design effective OL As scientists it is likely you have many more questions to offer and discuss
