## **Assessing Children's Mathematical Knowledge**

Barry Cooper, Mairéad Dunne, 2000 In many countries the lives of teachers and children are increasingly dominated by programmes of national testing of mathematics and other subjects In England the majority of the items in such tests have set mathematical tasks in every day situations such as shopping Assessing Children s Mathematical Knowledge draws on the analysis of National Curriculum test data from more than 600 children of 10 11 and 13 14 years of age as well as in depth interviews with 250 of these as they attempt to solve test problems in order to explore the nature of the difficulties children experience with realistic items The

book shows by comparing test and interview data that many children as a consequence of their confusion over the requirements of realistic test items fail in tests to demonstrate mathematical knowledge and understanding that they actually possess The book also explores whether this problem of invalid measurement is equally spread across children from different social backgrounds and across the sexes The book will be of interest to academics and teachers studying for advanced degrees in mathematics education sociology of education and educational assessment **BOOK JACKET** Title Summary field provided by Blackwell North America Inc All Rights Reserved **The Times Index**,2006 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement *IRE National Convention Record* Institute of Radio Engineers,1958 **IEEE International Convention Record** Institute of Electrical and Electronics Engineers,Institute of Radio Engineers,1958
