The core belief that Popular Science and our readers share: The future is going to be better and science and technology are the driving forces that will help make it better.

**Popular Mechanics**, 1985-08 Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home improvement tips, gadgets and digital technology information on the newest cars or the latest breakthroughs in science, PM is the ultimate guide to our high tech lifestyle. **Hypernomics** Doug Howarth, 2024-01-23 You've Never Seen What You've Always Needed to Know Until Now. Invisible forces are at work. They push and shove on everything you buy or sell. They affect every concept you want to take to market, all the suppliers you'll deal with and every customer you'll ever see. To be successful, you need to understand them. See them in detail in ways not possible with other methods. *Hypernomics: Using Hidden Dimensions to Solve Unseen Problems* discovers that markets behave according to previously unknown laws set by the buyers and sellers within them. It reveals those rules and how to detect, describe and deploy them to your advantage. It doesn't change economics so much as reveal it. It's like a microscope looking at pond water, a telescope tilted to the sky, sonar scanning the bottom of the ocean. *Hypernomics* lets you see into markets in ways you can't with the unaided eye. Sailors never navigate without a map. You shouldn't either, since your ship could wind up on the rocks. *Hypernomics* gives you the means to create market maps that show you where they have openings and how to fill them by giving customers what they want, don't have and can afford. It finds their thresholds and limits and responses to every possible feature in any product you can offer. The interactions *Hypernomics* describes have been with us since the dawn of humanity. Now you can finally see them and enjoy the advantages your competitors do not have. Validated by 13 published papers, multiple awards, a patent and customers such as NASA, Lockheed Martin, Virgin Galactic and a restaurant down the street, only *Hypernomics* gives you the ability to solve problems as varied as: How could a restaurant increase revenue by 25% by rearranging seating? How do you find, describe and capitalize on open spaces in your market? What happens when an NFL player decreases his forty yard dash time by a quarter of a second? If you tried to exceed a market's limitations, how could you lose 1B? How do markets change over time? Know what you need to Discover *Hypernomics*.
