Graham Winston, 2012-05-15 Global warming is a major phenomenon that is negatively affecting Earth But what most people don't realize is that this effect is not limited within the planet's atmosphere it may also affect Earth's journey through space In [Global Warming and Earth's Evolution](#) author Graham Winston reveals that the bigger picture is bigger than Global Warming and Global Warming is only the tip of the iceberg of Earth's own challenges The book describes the real truths of Global Warming is mainly caused by man's unnecessary destruction of natural resources earth depends on to be in a good condition to successfully complete its next evolution cycle The book explains the importance of the cycles and what evolutionary

changes occurred on earth Many previous unexplained phenomena could be linked to earths evolutionary cycles The extinction of the dinosaur the birth of the Grand Canyon why has no large object recently collided with the Moon when millions of craters exist on the Moon Why has the impacts stopped and when will the impacts start happening again These and other fascinating examples of unsolved phenomena will open the minds of many readers to this new dimension of thinking what happened on earth millions of years ago and whether earth will survive the next evolutionary cycle Global Warming has caused a negative effect on earth natural defense mechanism earth depends on to survive the severe challenges when close to the core of the Milky Way Galaxy About the Author Graham Winstons professional experience spans over 20 years and involves solving complex problems To achieve success in these business fields Winston solved many complex problems The common skill applied across these fields was the development of innovative thinking This later led to apply these same problem solving techniques on Global Warming and Earths evolution cycles to understand the relationship between Global Warming and Earths own evolutionary journey as Earth travels across the Universe Harper's New Monthly Magazine ,1872 Around the World on a Bicycle ...: From San Francisco to Teheran Thomas Stevens,1887
