Supernormal Meg Jay, 2017-12-28 In this seminal new study of resilience Meg Jay tells the stories of a diverse group of people who have overcome trauma in their childhoods to go on and live successful lives as adults. These are the supernormal who having shouldered greater than average hardship as children defy expectation and achieve better than average success as adults. But how and at what cost? Whether it was experiencing parental divorce or growing up with an alcohol or drug abusing parent living with a parent or sibling with mental illness, being bullied, living in poverty, being a witness to domestic violence, suffering physical or emotional neglect, the people Meg Jay introduces us to are all survivors. She explores what they have in common that made it possible for them to transcend the trauma of their early years and to build successful adult lives. And she asks the questions: What was the cost of developing those powers? And having survived, even thrived, how do you go on and build a trusting, fulfilled life? Drawing on her clinical experience with survivors of childhood trauma, Meg Jay documents ordinary people made extraordinary by the experience of all too common trauma. Bringing together personal, scientific and cultural knowledge, Jay gives a voice to the experience of the supernormal, furnishes them with the tools to better understand themselves and take full advantage of their strengths, and gives a window into their world for those who seek to understand them.

Imagination in Transition Bruce Barton, 2005 The move from playwright to cinema screenwriter and director is a rare accomplishment. No American writer has achieved this transition with the level of success enjoyed over the past two decades by David Mamet. Over this same period, Mamet has also authored a body of aggressive critical writing that demonstrates enduring aesthetic and ideological preoccupations regularly expressed as a set of confident best practices. However, the relationship between theory and practice becomes particularly and productively rowdy at the sites of Mamet's transitional media crossings. *Imagination in Transition* establishes a flexible set of core characteristics of Mamet's dramatic and theatrical dramaturgy and then compares these with the textual and cinematographic strategies employed by Mamet in his initial transitional feature films. This study then offers both an innovative approach to Mamet's work and an illuminating framework for cross media analysis.

The Business of Entertainment Robert C. Sickels, 2008-11-30 We love to be entertained. And today's technology makes that easier than ever. Listen to tunes while working out. No problem. Watch a movie on your cell phone. Can do. Get 450 channels of digital entertainment bounced off a satellite and into your vehicle, even while traveling through empty wastelands. Simple. But behind these experiences is a complex industry dominated by a handful of global media conglomerates whose executives exert considerable influence over the artists and projects they bankroll. The processes by which products are developed and the methods they use to promote and distribute entertainment. As this set shows, the industries in which commerce, art and technology intersect are among the most fascinating in all of business. Entertainment is a high stakes industry where stars are born and flame out in the blink of an eye, where multimillion dollar deals are made on a daily basis and where cultural mores for better or worse are shaped and reinforced. *The Business of Entertainment*

Entertainment lifts the curtain to show the machinery and sleight of hand behind the films TV shows music and radio programs we can't live without The Business of Entertainment comprises three volumes covering movies popular music and television But it's not all about stars and glitter it's as much about the nuts and bolts of daily life in the industry including the challenges of digitizing content globalization promoting stars and shows protecting intellectual property developing talent employing the latest technology and getting projects done on time and within budget Challenges don't end there There's also advertising and product placement the power of reviews and reviewers the cancerous spread of piracy the battles between cable and satellite operators and the threat to both from telephone companies the backlash to promoting gangsta lifestyles and more Each chapter is written by an authority in the field from noted scholars to entertainment industry professionals to critics to screenwriters to lawyers The result is a fascinating mosaic with each chapter a gem that provides insight into the industry that hands down generates more conversations on a daily basis than any other
