**Series for Data Science** Wayne A. Woodward,Bivin Philip Sadler,Stephen Robertson,2022-08-01 Data Science students and practitioners want to find a forecast that works and don t want to be constrained to a single forecasting strategy Time Series for Data Science Analysis and Forecasting discusses techniques of ensemble modelling for combining information from several strategies Covering time series regression models exponential smoothing Holt Winters forecasting and Neural Networks It places a particular emphasis on classical ARMA and ARIMA models that is often lacking from other textbooks on the subject This book is an accessible guide that doesn t require a background in calculus to be engaging but does not shy away from deeper explanations of the techniques discussed Features Provides a thorough coverage and comparison of a wide array of time series models and methods Exponential Smoothing Holt Winters ARMA and ARIMA deep learning models including RNNs LSTMs GRUs and ensemble models composed of combinations of these models Introduces the factor table representation of ARMA and ARIMA models This representation is not available in any other book at this level and is extremely useful in both practice and pedagogy Uses real world examples that can be readily found via web links from sources such as the US Bureau of Statistics Department of Transportation and the World Bank There is an accompanying R package that is easy to use and requires little or no previous R experience The package implements the wide variety of

models and methods presented in the book and has tremendous pedagogical use

**Linguistic Data Science and the English Passive** Axel Bohmann, Julia Müller, Mirka Honkanen, Miriam Neuhausen, 2025-11-13 The choice between BE and GET as auxiliary verbs as in She was promoted vs She got promoted is a central grammatical feature yet the many proposed nuances conditioning this phenomenon have escaped large scale empirical validation to date This book fills this gap using multivariate statistical analyses of several large corpora to explore different factors determining the choice of English passive auxiliary Addressing both diachronic developments using the Corpus of Historical American English and synchronic regional variation using the Corpus of Global Web based English the book employs methods that combine traditional corpus linguistics with newer machine learning tools in an innovative and intricate manner To circumscribe the variable context the authors train a statistical model to distinguish central from peripheral passives The study tests the influence of various predictors derived from the previous literature on the passive with the use of automated sentiment analysis and subject detection manual animacy coding distributional semantics and a mixed effects regression model Putting forward an automatic way of distinguishing more stative from more dynamic passives the book demonstrates how to examine the passive construction in a much larger dataset than in previous studies and shows how advanced computational models can be used to productively engage traditional philological questions such as those related to language change and regional variation

**Learning Data Science** Sam Lau, Joseph Gonzalez, Deborah Nolan, 2023-09-15 As an aspiring data scientist you appreciate why organizations rely on data for important decisions whether it's for companies designing websites cities deciding how to improve services or scientists discovering how to stop the spread of disease And you want the skills required to distill a messy pile of data into actionable insights We call this the data science lifecycle the process of collecting wrangling analyzing and drawing conclusions from data Learning Data Science is the first book to cover foundational skills in both programming and statistics that encompass this entire lifecycle It's aimed at those who wish to become data scientists or who already work with data scientists and at data analysts who wish to cross the technical nontechnical divide If you have a basic knowledge of Python programming you'll learn how to work with data using industry standard tools like pandas Refine a question of interest to one that can be studied with data Pursue data collection that may involve text processing web scraping etc Glean valuable insights about data through data cleaning exploration and visualization Learn how to use modeling to describe the data Generalize findings beyond the data
