

SOUTHERN LIGHTS AND SHADOWS

**Edited by
William Dean Howells
and Henry Mills Alden**

Southern Lights Shadows

John Stephen Farmer

Southern Lights Shadows:

Southern Lights and Shadows William Dean Howells, Henry Mills Alden, 1969 **Light as Experience and Imagination from Medieval to Modern Times** David S. Herrstrom, 2022-11-21 In *Light as Experience and Imagination from Medieval to Modern Times* David S. Herrstrom synthesizes and interprets the experience of light as revealed in a wide range of art and literature from medieval to modern times. The true subject of the book is making sense of the individual's relationship with light rather than the investigation of light's essential nature while telling the story of light seducing individuals from the Middle Ages to our modern times. Consequently, it is not concerned with the progress of scientific inquiries into the physical properties and behavior of light, optical science, but rather with subjective reactions as reflected in art, architecture, and literature. Instead of its evolution, this book celebrates the complexity of our relation to light's character. No individual experience of light being truer than any other.

Dark Skies Lonely Planet, Valerie Stimac, 2019-09-01 Witnessing the sweep of the Milky Way, the remains of comets burning up in our atmosphere, or the shimmering aurora, we better understand the universe and our place in it. Lonely Planet's *Dark Skies*, the first world's guide to astrotourism, can help you experience all of this and more first-hand. Meticulously researched by dark sky expert Valerie Stimac, this comprehensive companion includes guides to 35 dark sky sites and national parks where to see the aurora, the next decade of total solar eclipses, and how to view rocket launches, plus the lowdown on commercial space flight observatories and meteor showers. *Dark Skies* is divided into sections to help you plan your dark sky tour. *Stargazing* focuses on the basics of appreciating the dark sky with an overview on how to stargaze and what types of objects to look for, as well as tips for the urban stargazer. *Dark Places* is devoted to 35 of the best places around the globe for stargazing and experiencing the night sky, including sites designated by the Dark Sky Association. *Astronomy in Action* features some of the world's top research facilities and observatories where you can get a closer look at space science. *Meteor Showers* has everything you need to know about the most consistent and impressive meteor showers that happen annually. *Aurora* is divided into two parts, one focusing on the aurora borealis in the northern hemisphere and the other on the aurora australis in the southern hemisphere. *Eclipses* follows the schedule of total solar eclipses over the next decade. If you've never experienced totality, here is your definitive guide to planning your trip. *Launches* helps you experience a different side of astrotourism: rocket launches and the countries that allow you to travel to see them. *Space Tourism* discusses the future of humans in space, including you. The major players in the evolving space tourism market are detailed, plus the world's most common destinations and experiences. About Lonely Planet: Lonely Planet is a leading travel media company and the world's number one travel guidebook brand, providing both inspiring and trustworthy information for every kind of traveller since 1973. Over the past four decades, we've printed over 145 million guidebooks and grown a dedicated, passionate global community of travellers. You'll also find our content online on mobile, video, and in 14 languages, 12 international magazines, armchair and lifestyle books, ebooks, and more. Important Notice: The
