Synthetic Recapitulation Magic And Magism:

Paradoxes of the Highest Science Eliphas Lévy, 2023-01-31 Many paths lead to the mountain top and many and diverse are the rifts in the Veil through which glimpses may be obtained of the secret things of the Universe The Abb Louis Constant better known by his nom de plume of LIPHAS L VI was doubtless a seer but though his studies were by no means confined to this he saw only through the medium of the kabala the perfect sense of which is now a days hidden from all mere kabalists and his visions were consequently always imperfect and often much distorted and confused Moreover he was for a considerable portion of his career a Roman Catholic priest and as such had to keep terms to a certain extent with his church and even later when he was unfrocked he hesitated to shock the prejudices of the public and never succeeded in even wholly freeing himself from the bias of his early clerical training Consequently he not only erred at times in good faith not only constantly wrote ambiguously to avoid a direct collision with his ecclesiastical chiefs or current creeds but he not

unfrequently put forward Dogmas which taken in their obvious straightforward meanings he certainly did not believe nay I may say certainly knew to be false **Paradoxes of the Highest Science** Eliphas Levi, 2018-10-16 MANY paths lead to the mountain top and many and diverse are the rifts in the Veil through which glimpses may be obtained of the secret things of the Universe The Abb Louis Constant better known by his nom de plume of LIPHAS L VI was doubtless a seer but though his studies were by no means confined to this he saw only through the medium of the kabala the perfect sense of which is now a days hidden from all mere kabalists and his visions were consequently always imperfect and often much distorted and confused Moreover he was for a considerable portion of his career a Roman Catholic priest and as such had to keep terms to a certain extent with his church and even later when he was unfrocked he hesitated to shock the prejudices of the public and never succeeded in even wholly freeing himself from the bias of his early clerical training Consequently he not only erred at times in good faith not only constantly wrote ambiguously to avoid a direct collision with his ecclesiastical chiefs or current creeds but he not unfrequently put forward Dogmas which taken in their obvious straightforward meanings he certainly did not believe nay I may say certainly knew to be false **The Paradoxes of the Highest Science** Eliphas Lvi, 1922
