Systemic Change And Stabilization In Eastern Europe:

Systemic Change and Stabilization in Eastern Europe Anders Åslund, 1991 The systematic transformation from planning and bureaucratic coordination to a liberal private capitalist economic order has been a historic challenge for Central and South East European countries. It was inevitable that following the post revolutionary euphoria there would be a period of gathering stock as the true dimensions of the crisis came to be appreciated. What is clear is that the road from crisis to capitalism will be long and bumpy and this book focuses on some of the key policy relevant theoretical issues of strategic transformation. In doing this the contributors compare the situation in East Europe with non European experience particularly that of Latin America and attempt to establish a basis for redesigning and consolidating the crisis ridden Central and Eastern European States

On the Theory and Policy of Systemic Change Hans-Jürgen Wagener, 2012-12-06

Between 1989 and 1992 three colloquia on transformation problems were held at the Ludwig Reimers Stiftung Bad Homburg. At the end of the 1980s the collapse of the Soviet type socialist economic system had become clear and hence the necessity to transform these systems into an entirely different economic order. Similar processes have happened and still happen in other historical constellations for instance in developing countries. It has been the aim of the Transformation Colloquium to gain more theoretical insight into these phenomena. The object of research has been transformation defined as transition from a given economic order socialist planned economy e.g. to a consistent new order market economy. This is a highly complex phenomenon which occurred above all during the 20th century introduction and abolition of socialist systems transition from war economies to peace time market economies. Historical experience allows perhaps for certain generalizing abstractions. The central problem discussed at all up to now three colloquia is the question whether the object is amenable for theoretical analysis and which approaches eventually are promising

The Political Economy of the Transition Process in Eastern Europe Laszlo Somogyi, 1993-01-01 This well produced book is a worthy contribution to the burgeoning literature on the transition. The editor provides a useful introduction. Ian Jeffries The Economic Journal provides a useful and readable introduction to many of the most important issues in the transition process. Hugo Radice Economics of Transition. Why has industrial output fallen in Eastern Europe and is further decline inevitable. What lessons can be learned from the stabilization programmes of the first two years of the post communist era. Should the transitional economies privatize quickly and where do they find the missing institutions essential to the proper working of capitalism. In seeking answers to these and other questions The Political Economy of the Transition Process in Eastern Europe analyses the difficulties faced by nations attempting to move from a planned to a market economy with special emphasis on issues of macroeconomic stabilization and institutional change

Foreign Economic Liberalization Andras Koves, 2019-03-07 This groundbreaking volume combines theories of economic liberalization with a wide variety of case studies from market and socialist economies. Internationally regarded scholars and Eastern European policymakers have collaborated to evaluate the dramatic economic changes taking

place throughout the world The opening essays contribute to the theoretical debate by showing that foreign economic liberalization goes beyond reducing import barriers to policies on investment financial liberalization convertability and export promotion Case studies compare successful and unsuccessful liberalization attempts world wide The disintegration of the CMEA and the policy dilemmas facing Central and Eastern Europe are examined in great detail as the authors explore the pitfalls and opportunities inherent in the transformation from a centrally planned economy This up to date text will be invaluable for courses on the history and transformation of socialist economies comparative economic systems and international trade and investment **Systemic Transformation in the East of Europe** Hans-Hermann Höhmann,Christian Meier,1994 **1993** Patt Leonard,Rebecca Routh,1996 Journal articles books book chapters book reviews dissertations and selected government publications on East Central Europe and the former Soviet Union published in the United States and Canada *The Economic History of Central, East and South-East Europe* Matthias Morys,2020-12-29

The collapse of communism in Central East and South East Europe CESEE led to great hopes for the region and for Europe A quarter of a century on the picture is mixed in many CESEE countries the transformation process is incomplete and the economic catch up has taken longer than anticipated The current situation has highlighted the need for a better understanding of the long term political and economic implications of the Central East and South East European historical experience This thematically organised text offers a clear and comprehensive guide to the economic history of CESEE from 1800 to the present day Bringing together authors from both East and West the book also draws on the cutting edge research of a new generation of scholars from the CESEE region Presenting a thoroughly modern overview of the history of the region the text will be invaluable to students of economic history and CESEE area studies **Eastern Europe, 1986-1993** Robert

H. Burger,Helen F. Sullivan,1995-12-15 Describing approximately 1 000 books published between 1986 and late 1993 this work provides readers with a selective guide to English language publications on the subject of Eastern Europe It covers general studies of the area as well as works on the individual countries of Albania Bulgaria the former Czechoslovakia the former German Democratic Republic East Germany Hungary Poland Romania and the former Yugoslavia In addition to bibliographic and descriptive information the authors also include citations to book reviews A companion to their *Russia and the Former Soviet Union Libraries Unlimited* 1994 this volume also focuses on the social sciences and the humanities As interest about this part of the world continues to build and English language publications about it proliferate Burger and Sullivan s guide is a pertinent addition to academic and public library collections **The Globalization of Industry and Innovation in Eastern Europe** Christian von Hirschhausen,Jürgen Bitzer,2000-01-01 The topic is important and neglected and has major implications for the types of industrial policy that make any sense in transition countries The clear message of this book is that protective science and technology policies would for the most part be a total waste of money What is needed now is internationalization and a demand driven approach exactly the opposite of the former nationally based and supply led

systems existing under socialism Paul Hare Heriot Watt University Edinburgh UK Here is a book that goes beyond the abstractions and platitudes of conventional transition economics to look at what is really happening on the ground in the post socialist countries of Eastern Europe The Globalization of Industry and Innovation in Eastern Europe presents a provocative but richly documented assessment of the central dynamic issues facing the East European economies today David Dyker SPRU Science and Technology Policy Research University of Sussex UK In this important book industrial and enterprise reform over the last decade in Eastern Europe is critically reviewed in light of increasing Eastern integration into the global economy The authors argue for the further globalization of Eastern European enterprise networks as a condition for recovery and growth in the region Empirical evidence is provided from five industrial sectors car industry telecommunication shipbuilding computers software including case studies and international comparisons

Privatization and Economic Performance in Central and Eastern Europe European Association for Comparative Economic Studies,1999 This important book provides a comprehensive analysis of the impact of privatization on the economic performance of companies in Central and Eastern Europe It sheds new light on the achievements and shortcomings of the privatization process and draws out lessons for the future After considering the theoretical issues surrounding privatization the authors provide an in depth examination of corporate governance and company performance in advanced market economies as well as transition economies They begin with a description of the main principles techniques and results of privatization in Bulgaria Estonia Hungary and Poland A statistical and econometric analysis of extensive company level data and interviews from a large number of firms between 1990 and 1997 is then conducted to discover the main factors in changing economic performance Using this information the authors compare the transformation of the company sectors in the four countries and in addition assess company restructuring from the perspective of West European privatizations Privatization and Economic Performance in Central Eastern Europe will be of interest to policymakers in governments and international organizations and those working in the fields of microeconomics industrial organization and transition studies

Changing Global Political/ideological Context and Afro-Asia B. Ramesh Babu,1996 Contributed papers presented at a conference held at Hyderabad in March 1995 **Trade, Payments and Adjustment in Central and Eastern Europe** European Bank for Reconstruction and Development,1992 The economists of central and eastern Europe face problems at home the choices of exchange rate regimes and trades policy and the management of adjustment away from the trade and production patterns of communism This book offers guidance on the issues underlying these external policy areas

The Political Economy of Trade Regimes in Central Europe László Csaba,1994 **The Conditions for Economic Recovery in Central and Eastern Europe** Lutz Hoffmann,1992 Les Sociétés Transnationales United Nations Conference on Trade and Development. Programme on Transnational Corporations,1993 **Privatization in Eastern Europe** Iván Major,1993 The task of turning the state owned assets of the Eastern European countries over to private ownership is one of the most

challenging of our time both intellectually and in practical terms Ivan Major's in depth critique of the plans and programmes of the East European governments addresses the core issues of privatization from the perspective of both potential winners and losers. After discussing the analytical framework he offers an assessment of the legacy of the command economy and includes individual country studies of Czechoslovakia the former GDR Hungary Poland and the former Soviet Union. The following chapters look at the theoretical political and economic underpinning as well as assessments of the initial results of East European privatizations. Dr Major argues that the whole network of political regulation must be dismantled if an efficient market economy is to emerge. Privatization in Eastern Europe offers a critical analysis of the movement towards privatization in Eastern Europe as well as an authoritative assessment of the existing literature. This book will be welcomed by scholars and policymakers as an important source of analysis argument and information. Bibliographie Mensuelle.

Challenge of Reform in Indochina Börje Ljunggren, 1993 The chapters in this volume were first presented as papers in a seminar series developed by Ljunggren while he was a visiting scholar at HIID during the 1990/91 academic year. The papers by economists political scientists anthropologists journalists and aid administrators emphasize human and policy issues concerning Vietnam Laos and Cambodia since the end of the Second Indochina War in 1975. These three countries have gone through significant and comprehensive market reforms during this period. The authors all of whom have extensive experience in the region analyze these market transformations from varying perspectives including foreign policy history gender macroeconomics politics and social issues.
