*Theory and Practice in Functional-Cognitive Space* María de los Ángeles Gómez González,Francisco José Ruiz de Mendoza Ibáñez,Francisco Gonzálvez-García,Angela Downing,2014-07-22 The differences among functionalist cognitivist and or constructionist models are generally taken to be not absolute but rather a matter of emphasis and degree with an increasing permeability between paradigms arising from cross fertilizing influences This book further explores this burgeoning area of research through the notion of functional cognitive space namely the topography of the space occupied by functional cognitivist and or constructionist models against the background of formalist approaches in general and of Chomsky s Minimalism in particular Specifically the twelve contributions in the present volume update the reader on recent developments in functionalism Systemic Functional Grammar Functional Discourse Grammar and Role and Reference Grammar and cognitivism Word Grammar Cognitive Construction Grammar and the Lexical Constructional Model Plotting cognitive space proves particularly adequate for situating the six models represented in this volume not only in relation to each other but also potentially with respect to a wide spectrum of functionalist cognitivist and or constructionist models
