The Government Of Science In Britain Readings In Politics And Society:

Political Culture in Contemporary Britain William Lockley Miller, Annis May Timpson, Michael Harry Lessnoff, 1996 This is the most authoritative picture to date of what the British people and their politicians really think about the fundamentals of politics Based on new and revealing survey data it presents a wide ranging analysis of British attitudes to civil political and social rights The study uncovers two broad macro dimensions of political principle liberty and equality which underlie a large number of more specific principles and shape people's responses to many practical issues Controversially it claims that commitments to liberty and equality tend to run together only the least educated treat them as alternatives left wingers support both and right wingers oppose both It explores the influence of social background personal experience and the institutional setting on attitudes towards political principles highlighting in particular age and the complex influences of education and religion And it also shows how arguments and propaganda combine with political principles and party loyalties to influence opinion on practical issues The final chapter presents an overall model and quantifies the relative power of all these different influences The book will be invaluable reading for all those interested in British politics political sociology civil liberties and public opinion as well as those planning their own social science survey research **Undergraduate**
