quality assessment score is listed as well as a clinical bottom line paragraph to provide the reader with a summative statement. The predictor variables are well described and include multiple color pictures for clarity of explanation and ease of reproduction. To further assist the reader in their utilization of clinical prediction rules the authors have provided a decision making algorithm as well as multiple case studies demonstrating the inclusion of such rules into an evidence based clinical scenario. CPRs are becoming more frequent in the PT literature and this book provides students and clinicians with a strong working knowledge of the rules most pertinent to PT practice. With over 100 full color photos, illustrations and tables to demonstrate key exercises and concepts this user friendly text is an essential reference for students and clinicians alike. An Image Bank is available for instructors. Read the Foreword by Joshua A Cleland PT PhD Professor at Franklin Pierce University. Clinical prediction rules CPRs are algorithmic decision tools designed to aid clinicians in determining a diagnosis, prognosis or likely response to an intervention. They use a parsimonious set of clinical findings from the history, physical examination and diagnostic test results that have been analyzed and found to be statistically meaningful predictors of a condition or outcome of interest. Through the use of CPRs the clinician may be able to more effectively and efficiently treat patients, reduce practice variation and achieve optimal outcome measures. Features: detailed descriptions, full color illustrations and photos, and case studies for increased comprehension. Offers patient characteristics and screening tools to help make accurate diagnosis and treatment plan. Provides a valuable reference tool to effectively apply CPRs to day to day practice. This textbook offers a reference source for the large majority of rules existing to date.
