Research and British Postmodernism is a guide for scholars that aims to connect the complex relationships between print and
multimedia technological advancements and the influence of critical theory that converge in postwar British literature This
era is unique in that strict boundaries between fiction nonfiction multimedia and print are not useful Postmodern literature is
defined by the breaking down of boundaries as a reaction to modernism and requires an innovative multifaceted approach to
research In this guide the authors explore these complex relationships and offer strategies for researching this new period of
literature This book takes a holistic approach to postmodern literature that recognizes the way in which digital media film
critical theory popular music and more traditional print sources are inextricably linked Through this approach the authors
present a broad view of postmodernism that includes a wide variety of British authors writing in the last half of the twentieth
century The book's definition of postmodern includes any British literature following World War II that engages issues
central to postmodern theory including the social construction of gender sexuality and power the subjectivity of truth
technology as a social force intertextuality metafiction post colonial narrative and fantasy This guide aims to aid researchers
of postwar British literature by defining best practices for scholars conducting research in a period so broadly varied in the
