Sonic Self Musical Subjectivity And Signification:

The Sonic Self Naomi Cumming, 2000 Semioticians began by looking at literature but have gradually applied their techniques to other disciplines including music. The late Naomi Cumming based this consideration of the sources of musical expression on her experiences as a performer with interesting if rarely surprising results. Choice Using classical violin music as her principal laboratory the author examines how a performance incorporates distinctive features not only of the work but of the performer as well and how the listener goes about interpreting not only the composer's work and the performer's rendering of the work but also of the performer's and listener's identities. A richly interdisciplinary approach to a very common yet persistently mysterious part of our lives

Music, Subjectivity, and Schumann Benedict Taylor, 2022-04-07

What is musical subjectivity Drawing on philosophy and critical theory Benedict Taylor investigates this concept in relation to Schumann

The Pastoral in Charles Griffes's Music Taylor A. Greer, 2024-06-18 At the turn of the century visionary composer Charles Tomlinson Griffes synthesized highly diverse elements from other musical traditions into his distinct artistic voice. As American as he was far ranging in his interests Griffes was an aesthetic polyglot combining elements of literature visual arts global folk melodies and contemporary European art music into a new musical language. The breadth of his sources of inspiration are breathtaking including the sensual harmonies of fin de siècle French music the British Aesthetic Movement folk music drawn from the Middle East and Java and a wide range of poets including William Blake Samuel Taylor Coleridge and William Sharp. The Pastoral in Charles Griffes's Music explores both his music and the rich historical context from which it grew to enrich our understanding of the composer's artistic contribution and reveal new intersections and contradictions in European and American culture during the early twentieth century. Taylor A Greer also critiques the philosophical foundation of topic theory and its relationship to the pastoral in Griffes's music to reflect on the end of the nineteenth century and clarify our understanding of his artistic influences. With Griffes's conception of the pastoral he transformed the siciliana based tradition he inherited from the eighteenth century into a new and vibrant genre that preserved the usual associations of simplicity and tranquility and introduced new elements of tension into the pastoral ideal including global voices paradox and occasional conflict

Collaborative and Distributed Processes in Contemporary

Music-Making Richard Glover, Lauren Redhead, 2020-04-09 This volume represents the second proceedings of the Royal Musical Association's RMA Music and as Process Study Group. It is not surprising that a large number of the contributors to the Music and as Process Study Group are active practitioners in the performance and composition of contemporary music. The collaborations documented here represent the bringing together of disciplines joint work between practitioners who contribute their own specific areas of expertise to a composite creative activity and work that crosses disciplines in order to make a critical comment in each of them. In this collection these three types of collaborative work describe an increasing amount of contemporary music practice. In addition to the increasing involvement of practice in research the understanding and prevalence of practice methodologies in the form of practice research has also increased in musicology. This volume reflects these concerns through contributions from authors who are all active practitioners in their respective fields of music performance composition improvisation and conducting. The diversity of these contributions shows the variety of processes and practices that are currently being undertaken by proponents of the field of contemporary music. These essays provide a snapshot of the current collaborative and distributed processes that are employed by today's contemporary music practitioners. The chapters contained in this volume reveal the varied nature of the approaches to creativity in music making and the ways that these are distributed across its practitioners during each stage of the development of musical works.

Rethinking Music through Science and Technology Studies Antoine Hennion, Christophe Levaux, 2021-05-03 This volume seeks to offer a new approach to the study of music through the lens of recent works in science and technology studies (STS) which propose that facts are neither absolute truths nor completely relative but emerge from an intensely collective process of construction. Applied to the study of music this approach enables us to reconcile the human social, factual and technological aspects of the musical world and opens the prospect of new areas of inquiry in musicology and sound studies. Rethinking Music through Science and Technology Studies draws together a wide range of both leading and emerging scholars to offer a critical survey of STS applications to music studies considering topics ranging from classical music instrument making to the ethos of DIY in punk music. The book's four sections focus on key areas of music study that are impacted by STS: organology, sound studies, music history and epistemology. Raising crucial methodological and epistemological questions about the study of music this book will be relevant to scholars studying the interactions between music culture and technology from many disciplinary perspectives

Philosophy of Music Education Review, 2013

The

Oxford Handbook of Music Psychology Susan Hallam, Ian Cross, Michael Thaut, 2009 The Oxford Handbook of Music Psychology is the definitive comprehensive and authoritative text on this burgeoning field. With contributions from over fifty experts in the field the range and depth of coverage is unequalled. It will be an essential resource for students and researchers in psychology **Journal of Music Theory Pedagogy**, 2010 *Music, Meaning and Media* Erkki Pekkilä, David Neumeyer, Richard Littlefield, 2006 **Danish Yearbook of Musicology**, 2006 *Canadian University Music Review*, 2005 *Current Musicology* Austin Clarkson, 2007 **Muzikološki zbornik**, 2005 **Recorded Music** Mine Doğantan, 2008 Bringing together an international collection of experts this work explores various philosophical issues surrounding modern music recordings. With perspectives from practicing musicians, musicologists, sound artists and recordings engineers this reference asks how theoretical issues related to their work relate to the context of making and using recordings. Additional questions asked by this study include: What kind of spatiality is generated through recordings and by what means? What is the nature of recorded space? Do recordings reflect musical reality or create one? and What are the philosophical bases of an ethics of recording **Pleasure and Meaning in the Classical Symphony** Melanie Diane Lowe, 2007-02-07 The effects meaning of classical music from the late 18th century to today *Deepening Musical Performance Through Movement* Alexandra Pierce, 2007 Alexandra Pierce helps musicians gain a richer understanding of music through the use of the body and gesture. She asserts that expression of character and affect in music corresponds to expression of character and affect in physical gesture. She seeks to answer the question: What is vitality in music and to find answers that contribute to hearing and performing this core quality of music and that can be integrated into the daily practice of a musician. Pierce's approach is to isolate and explore through movement such elements of music as melody, beat and structural levels. Short narratives that illustrate how performance practice problems can be approached and solved are scattered throughout the book **Semiotica**, 2000 **AMS Newsletter** American Musicological Society, 1997 **The American Organist**, 2005
