Sophocles The Classical Heritage:

Sophocles (Routledge Revivals) Roger Dawe, 2014-02-04 Sophocles The Classical Heritage first published in 1996 contains a diverse collection of reflection ranging from the 16th century to the 20th on one of the three great Attic tragedians the author of perhaps the most famous play of all time With the entire notion of Western culture under duress the need to establish continuity from antiquity to modernity is as pressing as ever Each essay selected by Professor Dawe explores a theme or concept derived from the tragic vision of the Sophoclean universe which is still of relevance today An enormous range of topics is investigated in a variety of modes and styles the linguistic challenges of translation the psychology of Sigmund Freud Enlightenment critiques the history of performance conventions dramatic structure and technique and issues facing the modern director Overall Professor Dawe offers a staggering selection of responses which cumulatively demonstrate the continuing importance and fascination of Sophocles legacy **Sophocles** Roger David Dawe, 1996 Linked by their common setting in Thebes Antigone Oedipus the King and Oedipus at Colonus stand at the fountainhead of world drama This volume presents a new and accurate yet poetic and playable translation by playwright Don Taylor who has also directed plays for a BBC TV production [The Emergence of Subjectivity in the Ancient and Medieval World](#) Jon Stewart, 2020-03-24 The Emergence of Subjectivity in the Ancient and Medieval World An Interpretation of Western Civilization represents a combination of different genres cultural history philosophical anthropology and textbook It follows a handful of different but interrelated themes through more than a dozen texts that were written over a period of several millennia and by means of an analysis of these texts presents a theory of the development of Western civilization from antiquity to the Middle Ages The main line of argument traces the various self conceptions of different cultures as they developed historically reflecting different views of what it is to be human The thesis of the volume is that through examination of these changes we can discern the gradual emergence of what we today call inwardness subjectivity and individual freedom As human civilization took its first tenuous steps it had a very limited conception of the individual Instead the dominant principle was that of the wider group the family clan or people Only in the course of history did the idea of what we now know as individuality begin to emerge and it took millennia for this idea to be fully recognized and developed The conception of human beings as having a sphere of inwardness and subjectivity subsequently had a sweeping impact on all aspects of culture including philosophy religion law and art indeed this notion largely constitutes what is today referred to as modernity It is easy to lose sight of the fact that this modern conception of human subjectivity was not simply something given but rather the result of a long process of historical and cultural development **Tragic Props and Cognitive Function** Colleen Chaston, 2010 By applying aspects of cognitive psychology to a study of three key tragic props this book examines the importance of visual imagery in ancient Greek tragedy The shield the urn and the mask are props which serve as controls for investigating the connection between visual imagery and the spectators intellectual experience of tragic

drama As vehicles for conceptual change the props point to a function of imagery in problem solving Connections between the visual and the cognitive in tragedy particularly through image shape and its potential for various meanings add a new perspective to scholarship on the role of the visual in ancient performance These connections also add weight to the importance of imagery in contemporary problem solving and creative thought
