## **Sort Of Peace:**

*Peace Formation and Political Order in Conflict Affected Societies* Oliver P. Richmond, 2016-02-23 As Oliver Richmond explains there is a level to peacemaking that operates in the realm of dialogue declarations symbols and rituals But after all this pomp and circumstance is where the reality of security development politics economics identity and culture figure in conflict cooperation and reconciliation are at their most vivid at the local scale Thus local peace operations are crucial to maintaining order on the ground even in the most violent contexts However as Richmond argues such local capacity to build peace from the inside is generally left unrecognized and it has been largely ignored in the policy and scholarly literature on peacebuilding In Peace and Political Order Richmond looks at peace processes as they scale up from local to transnational efforts to consider how to build a lasting and productive peace He takes a comparative and expansive look at peace efforts in conflict situations in countries around the world to consider what local voices might suggest about the inadequacy of peace processes engineered at the international level As well he explores how local workers act to modify or resist peace processes headed by international NGOs and to what degree local actors have enjoyed success in the peace process and how they have affected the international peace process

## **System, Order, and International Law**

Stefan Kadelbach, Thomas Kleinlein, David Roth-Isigkeit, 2017-04-05 For many centuries thinkers have tried to understand and to conceptualize political and legal order beyond the boundaries of sovereign territories Their concepts deeply entangled with ideas of theology state formation and human nature form the bedrock of todays theoretical discourses on international law This volume engages with models of early international legal thought from Machiavelli to Hegel before international law in the modern sense became an academic discipline of its own The interplay of system and order serves as a leitmotiv throughout the book helping to link historical models to contemporary discourse Part I of the book covers a diverse collection of thinkers in order to scrutinize and contextualize their respective models of the international realm in light of general legal and political philosophy Part II maps the historical development of international legal thought more generally by distilling common themes and ideas such as the relationship between universality and particularity the role of the state the influence of power and economic interests on the law and the contingencies of time space and technical opportunities In the current political climate where it appears that the reinvigorated concept of the nation state as an ordering force competes with internationalist thinking the problems at issue in the classic theories point to contemporary questions is an international system without central power possible How can a normative order come about if there is no
