Sound Of Pink The:

Soundscapes: Humans and Their Acoustic Environment Brigitte Schulte-Fortkamp, André Fiebig, Joseph A. Sisneros, Arthur N. Popper, Richard R. Fay, 2023-04-24 The concept of the Soundscapes includes all of the sounds in one environment and focuses not only on the sounds itself Instead it focuses on the interrelationships between person and activity and place both in space and time Soundscape also include influences on the acoustic environment through auditory sensation its interpretation and the responses to the acoustic environment in context The conceptual framework of Soundscape describes the process of perceiving or experiencing and or understanding an acoustic environment highlighting general concepts and their relationships context sound sources acoustic environment auditory sensation interpretation of auditory sensation responses and outcomes International Organization for Standardization ISO 12913-1 2014 Acoustics Soundscapes Part Definition and Conceptual Framework ISO Geneva 2014 With soundscape one achieves a deeper understanding of acoustic environment and its effects on people The ISO standard 12931-1 on soundscape provides an important and rigorous distinction in the use of Soundscape But it is recognizable that some individuals particularly planners designers lay persons and even those primarily interested in management of the acoustic environment through environmental noise control will find it convenient to use Soundscape as a synonym for the physical acoustic environment When it comes to noise management and urban planning soundscape research has the potential to promote healthy urban environments by sharing and incorporating the significant knowledge of all concerned parties Understandably this shows that the communication with regard to noise management has to be forced to guarantee that the specifics of Soundscapes i.e. the relevance of perception are seriously considered alongside the whole This book will bridge the gap between soundscape theory and practice and therefore it will be different from our earlier publications as Soundscape and the built environment ed by J Kang and B Schulte Fortkamp CRC Press Taylor and Francis Group Boca Raton Fl 2016 and also from the respective Special Issues on Soundscapes in 2012 in The Journal of the Acoustical Society of America ed by B Schulte Fortkamp and J Kang and also the Special Issue in Acta Acustica 2006 ed by B Schulte Fortkamp and D Dubois and the E book on soundscape This volume will be driven by the difficult process of standardization of Soundscape and its evaluation procedures The main goal of the proposed volume is to present and review the developments in Soundscape reflecting the standardization procedure and the diverse inputs the needs in management and planning in urban acoustic environments the book will also focus on the difficulties as well as the solutions in interdisciplinary grounded communication that is on the one hand related to science but on the other to application that needs guidance
