**Sonoita Plain** Carl E. Bock, 2005 The Appleton Whittell Research Ranch is a tract of 8 000 acres on the Sonoita Plain that was established in 1968 by the Appleton family and is now part of the sanctuary system of the National Audubon Society To all appearances it is an ordinary piece of land but for the last 35 years it has been treated in an extraordinary way by leaving it alone No grazing to influence grass production No dam building to hold back flash floods No pest control No firefighting By employing such nonaction might we gain a glimpse of what this land was like hundreds even thousands of years ago Through essays and photographs focusing on the Research Ranch Sanctuary and surrounding area this book reveals the complex ecology and unique aesthetics of its grasslands and savannas Carl and Jane Bock and Stephen E Strom share a passion for the remarkable beauty found here and in their book they describe its environment biodiversity and human history Connecting Mountain Islands and Desert Seas ,2005 **The View from Bald Hill** Carl E. Bock, Jane H. Bock, 2000-05-16 In 1540 Francisco Vasquez de Coronado introduced the first domestic livestock to the American Southwest Over the subsequent four centuries cattle horses and sheep have created a massive ecological experiment on these arid grasslands changing them in ways we can never know with certainty The Appleton Whittell Research Ranch in the high desert of southeastern Arizona is an 8 000 acre sanctuary where grazing has been banned since 1968 In this spirited account of thirty years of research at the ranch Carl and Jane Bock summarize the results of their fieldwork which was aimed at understanding the dynamics of grasslands in the absence of livestock The View from Bald Hill provides an intimate look at the natural history of this unique site and illuminates many issues pertaining to the protection and restoration of our nation s grasslands Scenic Driving Arizona Stewart M. Green, 2023-08-01 Scenic Driving Arizona features more than thirty drives ranging from 20 to 200 miles long through Arizona s most spectacular landscapes including the Grand Canyon Petrified Forest Monument Valley and the Sonoran Desert Included are route maps in depth descriptions of special attractions and historical points and tips on lodging camping and dining **Proceedings RMRS.** ,1998 Arizona Scenic Drives Stewart M. Grasslands have figured prominently in our North American heritage. Prairies first provided significant barriers to westward expansion then offered both economic and sociological opportunity as well as heartache for settlers. Many artists have gained significant inspiration from the beauty as well as the harshness of these regions and its biota. And because of ideal climate and soil conditions these grasslands have provided the agricultural foundation upon which much of the growth and stability of the United States economy rests. Yet many see North America prairies as beautiful only when manipulated or exploited. Green croplands or manicured park lawns are attractive whereas native grasslands are those ugly weeds. In the past plowing virgin prairie could be easily defended on both economic and sociological grounds. And historically North American prairies must have seemed threatening in both their wildness and vastness. But preservation of these prairies is now an urgent need. This book describes the ecology of the North American prairie and urges conservation measures to protect the remaining North American grasslands. It provides non economic arguments for the value of prairies, presents a current synthesis of prairie ecology to facilitate the best possible management and deftly summarizes conservation and management issues, pointing out the costs and benefits of alternative actions. By approaching its subject from a variety of perspectives including ethical and aesthetic considerations the book will appeal to environmentalists and conservationists as well as to ecologists, botanists and conservation biologists.
