

SOUND VS IRRELEVANT EVIDENCE POSTER

SOUND EVIDENCE

Sound evidence is relevant, accurate, and directly supports a claim or argument. It's well-explained, comes from a credible source, and clearly connects to the point being made.

Traits of Sound Evidence:

- Comes from credible sources
- Directly supports the claim
- Is fact-based or logically reasoned
- Is specific and detailed
- Often includes data, quotes, examples, or research

Example:

Claim: Social media has both positive and negative effects on teens.

Sound Evidence: According to a 2023 Pew Research study, 32% of teens report feeling more connected to their friends because of social

VS

IRRELEVANT EVIDENCE

Irrelevant evidence does not clearly relate to or support the argument. It might be off-topic, vague, distracting, or included just to sound impressive without real connection to the point.

Traits of Irrelevant Evidence:

- Off-topic or loosely related
- Doesn't clearly support the claim
- Lacks detail or explanation
- From an unreliable source or personal opinion with no backup

Example:

Claim: Social media has both positive and negative effects on teens.

Irrelevant Evidence: Some teens while scrolling social

Self-Reference S.J. Bartlett, P. Suber, 2012-12-06 Self reference although a topic studied by some philosophers and known to a number of other disciplines has received comparatively little explicit attention For the most part the focus of studies of self reference has been on its logical and linguistic aspects with perhaps disproportionate emphasis placed on the reflexive paradoxes The eight volume Macmillan Encyclopedia of Philosophy for example does not contain a single entry in its index under self reference and in connection with reflexivity mentions only relations classes and sets Yet in this volume the introductory essay identifies some 75 varieties and occurrences of self reference in a wide range of disciplines and the bibliography contains more than 1 200 citations to English language works about reflexivity The contributed papers investigate a number of forms and applications of self reference and examine some of the challenges posed by its difficult temperament The editors hope that readers of this volume will gain a richer sense of the still largely unexplored frontiers of reflexivity and of the indispensability of reflexive concepts and methods to foundational inquiries in philosophy logic language and into the freedom personality and intelligence of persons Proceedings of the Fourth International Workshop on Digital Forensics & Incident Analysis (WDFIA 2009), 2009 *Forensic Engineering* Max M. Meijers, 2012-11-30 This book is a distinctive fusion of philosophy and technology delineating the normative landscape that informs today's technologies and tomorrow's inventions The authors examine what we deem to be the internal norms that govern our ever expanding technical universe Recognizing

that developments in technology and engineering literally create our human future transforming existing knowledge into tomorrow's tools and infrastructure they chart the normative criteria we use to evaluate novel technological artifacts how for example do we judge a good from a bad expert system or nuclear power plant As well as these functional norms and the norms that guide technological knowledge and reasoning the book examines commonly agreed benchmarks in safety and risk reduction which play a pivotal role in engineering practice Informed by the core insight that in technology and engineering factual knowledge relating for example to the properties of materials or the load bearing characteristics of differing construction designs is not enough this analysis follows the often unseen foundations upon which technologies rest the norms that guide the creative forces shaping the technical landscape to come The book a comprehensive survey of these emerging topics in the philosophy of technology clarifies the role these norms epistemological functional and risk assessing play in technological innovation and the consequences they have for our understanding of technological knowledge
