Long/Short Market Dynamics Clive M. Corcoran, 2007-02-06 Hedge funds are now the largest volume players in the capital markets. They follow a wide assortment of strategies but their activities have replaced and overshadowed the traditional model of the long only portfolio manager. Many of the traditional technical indicators and commonly accepted trading strategies have become obsolete or ineffective. The focus throughout the book is to describe the principal innovations that have been made within the equity markets over the last several years and that have changed the ground rules for trading activities. By understanding these changes the active trader is far better equipped to profit in today's more complex and risky markets. *Long Short Market Dynamics* includes A completely new technique Comparative Quantiles Analysis for identifying market turning points is introduced. It is based on statistical techniques that can be used to recognize money flow and price momentum divergences that can provide substantial profit opportunities. Power laws regime shifts self organized criticality phase transitions network dynamics econophysics algorithmic trading and other ideas from the science of complexity are examined. All are described as concretely as possible and avoiding unnecessary mathematics and formalism. Alpha generation portfolio construction hedge ratios and beta neutral portfolios are illustrated with case studies and worked examples. Episodes of financial contagion are illustrated with a proposed explanation of their origins within underlying market dynamics.

High-Performance Chevy Small-Block Cylinder Heads Graham Hansen, 2007 This book shows you how to choose the best cylinder head for your application. It covers both Gen I and Gen II small block Chevy versions occasionally touching on the Gen III and Gen IV production versions. This book taps into some of the best small block Chevy cylinder head resources this country has to offer with a combination of insight and best guesstimates because much of what we know about port design and airflow management falls under the category of art rather than science.
