Challenging the Growth Machine Barbara Ferman, 1996 Economic development and urban growth are the contested grounds of urban politics Business elites and politicians tend to forge pro growth coalitions centered around

downtown development while progressive and neighborhood activists counter with a more balanced approach that features a strong neighborhood component Urban politics is often shaped by this conflict which has intellectual as well as practical dimensions In some cities neighborhood interests have triumphed in others the pro growth agenda has prevailed In this illuminating comparative study Barbara Ferman demonstrates why neighborhood challenges to pro growth politics were much more successful in Pittsburgh than they were in Chicago Operating largely in the civic arena Pittsburgh's neighborhood groups encountered a political culture and institutional structure conducive to empowering neighborhood progressivism in housing and economic development policymaking In contrast the pro growth agenda in Chicago was challenged in the electoral arena which was dominated by machine ward based politicians who regarded any independent neighborhood organizing as a threat Consequently neighborhood demands for policymaking input were usually thwarted Besides revealing why the development policies of two important American cities diverged Ferman's unique comparative approach to this issue significantly expands the scope of urban analysis Among other things it provides the first serious study to incorporate the civic sector neighborhood politics as an important component of urban regimes Ferman also emphasizes institutional and cultural factors often ignored or relegated to residual roles in other studies and expounds on their influence in shaping local politics and policy To add an analytical and normative dimension to urban analysis she focuses on the non elite actors not just the economic and political elites who compose governing coalitions Ultimately Ferman takes a more holistic and balanced view of large cities than is typical for urban studies as she argues that neighborhoods are an important integral part of what cities are and can be For that reason especially her work will have a profound impact upon our understanding of urban politics

Perspectives on the European Past Norman F. Cantor, 1971 *The Decline of the West...: Perspectives of world-history* Oswald Spengler, 1928 Contains Spengler's well known work on the history of and the rise and fall of various civilizations *Perspectives in Indian Politics and Administration* Sakendra Prasad Singh, 1981

Articles The Old Oligarch Robin Osborne, 2004 A translation of Pseudo Xenophon's Constitution of Athens with an introduction **Perspectives of world history** Oswald Spengler, 1950 Global Perspectives on River Conservation P. J. Boon, B. R. Davies, Geoffrey E. Petts, 2000-10-03 Throughout the world river conservation is becoming an increasingly important concern In arid regions for instance rivers often form the only water resource for human sustenance indeed the World Bank has predicted that future wars will be about water In many parts of the developing world rivers are used as repositories for waste and river ecosystems consequently reflect the worst excesses of human exploitation In the industrialised nations the focus of attention is beginning to move from chemical clean up to restoring the structural damage to rivers caused by decades of river engineering Recognition is growing that river management needs a catchment wide perspective if the needs of human populations river habitats and wildlife are to reach a sustainable balance The development of river conservation strategies has become a global imperative Global Perspectives on River Conservation is the first book

that provides a truly global synthesis of knowledge on river conservation with the aim of encouraging strategic river planning. It does this in two ways. First, it sets out a worldwide region by region overview of the science, policy, and practice of river conservation. Second, it provides a topical review of different river settings such as tropical, temperate, temporary, perennial, large, small, and contemporary issues in river conservation such as classification and evaluation, environmental legislation, the role of public participation. *Global Perspectives on River Conservation* is an invaluable reference for river managers, planners, and developers, conservationists, statutory water agencies, government departments, academics, researchers, postgraduates, and final year undergraduates working in the field of environmental management of inland waters. **The Saturday Review of Politics, Literature, Science, Art, and Finance**, 1875. *The Saturday Review of Politics, Literature, Science and Art*, 1873. **The Discretionary President** Benjamin A. Kleinerman, 2009. Examines both the peril and the promise of presidential power to clarify that what can destroy our Constitution can if the threat is dire also save it. An unusually balanced study that argues for a middle path whereby presidents choose consciously to act temporarily outside or even against the laws in serving the nation's best interest. *A History of the Western World: The age of revolution to the present* Bryce Dale Lyon, 1974. *New Perspectives on American Politics* Lawrence C. Dodd, Calvin C. Jillson, 1994. This collection of 17 original essays surveys all major aspects of American politics from political participation to institutional processes to public policymaking. This book identifies recurring political themes, social conduct and conflict issues, candidates and elections, policy agendas, and institutional politics and asks if politicians of the 1990s can bring stability and coherence to the changing U.S. political system. To facilitate understanding of contemporary American politics, the role of ideas and issue agendas in shaping policy direction and governing processes is covered.
