Bhowmik, 2008-08-18 Writing Okinawa is the first comprehensive study in English of Okinawan fiction from its emergence in the early twentieth century through its most recent permutations It provides readings of major authors and texts set against a carefully researched presentation of the region s political and social history at the same time it thoughtfully engages with current critical perspective with perspectives on subaltern identity colonialism and post colonialism and the nature of regional minority and minor literatures Is Okinawan fiction replete with geographically specific themes such as language loss identity and war a regional literature distinct among Japanese letters for flourishes of local color that offer a reprieve for the urban weary or a minority literature that serves as a site for creative resistance and cultural renewal This question drives the book s argument making it interpretative rather than merely descriptive Not only does the book provide a critical introduction to the major works of Okinawan literature it also argues that Okinawa s writers consciously exploit to good effect the overlap that exists between regional and minority literature In so doing they produce a rich body of work a great deal of which challenges the notion of a unified nation that seamlessly rises from a single language and culture **Drama and Education** Manon van de Water, Mary McAvoy, Kristin Hunt, 2015-02-20 Drama and Education provides a practical comprehensive guide to drama as a tool for teaching and learning It is among the first practical drama and performance textbooks that address brain based neuroscientific research making the argument that creativity is necessary in our lives that embodied learning is natural and

Jennings,Gretta Berghammer,1986 Since the beginning of the theatre for youth movement in the United States at the turn of the century the majority of plays written for children have been fairy tales By the 1960s however encouraged by changes in social attitudes toward children playwrights began to respond to a growing tendency on the parts of both parents and teachers to have children face rather than avoid the more difficult truths of existence Thus children s dramatic literature was opened to new subjects themes and characters previously considered unsuitable for the young audience Theatre for Youth seeks to identify and illustrate this trend by examining twelve plays that deal with mature themes aging death and dying conformity sexuality divorce moral culpability The plays have been chosen not only for their mature content but also for their professional integrity the delicacy with which they handle their subject matter and their respect for their intended audience An excellent foreword by Jed H Davis an introduction and summary paragraphs for each play by Jennings and Berghammer and a lengthy annotated list of suggested plays for further reading or viewing make this volume extremely useful both for directors of children s theatre and for teachers **Multiethnic Studies in the Elementary School Classroom** Pat Marquevich,Shelly Spiegel,1975 **American Artist** Ernest William Watson,Arthur Leighton Gupitll,1967 **Shifting Cultivation and Environmental Change** Malcolm F. Cairns,2015-01-09 Shifting cultivation is one of the oldest forms of subsistence agriculture and is still practised by millions of poor people in the tropics Typically it involves clearing land often forest for the growing of crops for a few years and then moving on to new sites leaving the earlier ground fallow to regain its soil fertility This book brings together the best of science and farmer experimentation vividly illustrating the enormous diversity of shifting cultivation systems as well as the power of human ingenuity Some critics have tended to disparage shifting cultivation sometimes called swidden cultivation or slash and burn agriculture as unsustainable due to its supposed role in deforestation and land

degradation However the book shows that such indigenous practices as they have evolved over time can be highly adaptive to land and ecology In contrast scientific agricultural solutions imposed from outside can be far more damaging to the environment and local communities The book focuses on successful agricultural strategies of upland farmers particularly in south and south east Asia and presents over 50 contributions by scholars from around the world and from various disciplines including agricultural economics ecology and anthropology It is a sequel to the much praised Voices from the Forest Integrating Indigenous Knowledge into Sustainable Upland Farming RFF Press 2007 but all chapters are completely new and there is a greater emphasis on the contemporary challenges of climate change and biodiversity conservation **A.L.A.**
