## **Telling Stories:**

*Girls in Power* Laura Fingerson, 2012-02-01 Girls in Power offers a fascinating and unique look at the social aspects of menstruation in the lives of adolescent girls and also in the lives of adolescent boys. Although there has been much research on other aspects of gender and the body, this is one of the few books to examine menstruation and the first to explore how it plays a part in power interactions between boys and girls. Talking openly in single and mixed gender settings, individuals and groups of high school age girls and boys share their interpretations and experiences of menstruation. Author Laura Fingerson reveals that while teens have negative feelings about menstruation, teen girls use their experiences of menstruation as a source of embodied power in their interactions with other girls and with boys. She also explores how boys deal with their own reduced power. The book extends our theoretical and analytical understanding of youth gender power and embodiment by providing a more balanced view of adolescent social life.

**Storytelling** Janice M. Del Negro, 2021-06-24 This book serves as both a textbook and reference for faculty and students in LIS courses on storytelling and a professional guide for practicing librarians, particularly youth services librarians in public and school libraries. Storytelling Art and Technique serves professors, students, and practitioners alike as a textbook, reference, and professional guide. It provides practical instruction and concrete examples of how to use the power of story to build literacy and presentation skills as well as to create community in those same educational spaces. This text illustrates the value of storytelling, covers the history of storytelling in libraries and offers valuable guidance for bringing stories to contemporary listeners with detailed instructions on the selection, preparation, and presentation of stories. It also provides guidance around the planning and administration of a storytelling program. Topics include digital storytelling, open mics and slams, and the neuroscience of storytelling. An extensive and helpful section of resources for the storyteller is included in an expanded Part V of this edition.

**Engaging Community through Storytelling** Sherry Norfolk, Jane Stenson, 2017-07-25 This exploration of model storytelling projects shows librarians how to expand their roles as keepers of the stories while strengthening their communities. Community life is built on its stories. Our history and culture, those of society and of individuals, are passed from generation to generation through stories. Engaging Community through Storytelling: Library and Community Programming examines a wide variety of model storytelling projects across the country, reflecting how storytelling can encourage community attachment, identity, and expression in libraries, community centers, and schools. The contributed essays, written by experts in their fields, many of whom served as developer, fundraiser, director, and implementer of their project, provide detailed information about the inner workings of a wide variety of model storytelling projects from across the country. The authors delineate the need, scope, and audience for each project and offer riveting anecdotes that evaluate the success of that project. Many of the articles are accompanied by one or more photographs documenting the work or practical how-to guides to encourage and enable replication. Thoughtful commentary on and review of the key concepts in each chapter are provided by the book's editors.
