Temas De Inmunoalergia 2:

Inmunología. Una ciencia activa 2.a edición María Teresa Rugeles López, Carlos Julio Montoya Guarín, 2009

Puesta al día en medicina interna. Temas de inmunología y alergias Carlos Lenin Pliego Reyes, Alfredo Cabrera Rayo, Nayeli Gabriela Jiménez Saab, 2024-08-26

Puesta al día en medicina interna comprende una serie de textos monográficos escritos por destacados especialistas que no solo presentan una revisión exhaustiva de cada tema sino que también transmiten la experiencia acumulada en su ver leer y hacer cotidiano Este proyecto se realiza pensando en facilitar la labor y el aprendizaje de médicos internos de pregrado residentes y médicos de medicina interna así como de otras especialidades afines sin olvidar por supuesto a médicos generales y familiares en quienes recae la enorme responsabilidad de realizar diagnósticos e inicios de tratamiento adecuados La inmunología es en la actualidad una ciencia compleja Su objetivo inicial consistió en el estudio de las respuestas de defensa que han desarrollado los seres vivos frente a la invasión de microorganismos o partículas extrañas aunque su interés se ha volcado especialmente en los mecanismos altamente evolucionados e integrados dotados de especificidad y de memoria frente a agentes reconocidos por el cuerpo como no propios así como en su neutralización y degradación Con el paso del tiempo los estudiosos de este tema descubrieron que este sistema de defensas no solo libra de enfermedades sino que activado anormalmente condiciona a la misma enfermedad dando origen a las enfermedades autoinmunitarias Desde los escritos chinos donde se consigna el inicio de la inmunización con la observación de que los individuos sanos inoculados con fragmentos de costras de pacientes con viruela presentaban protección contra la enfermedad grave la inmunización más elaborada por Pasteur y los descubrimientos de Paul Erlich y su teoría del horror autotóxico autoinmunidad hasta los descubrimientos más actuales que desentrañan los fenómenos de reorganización genética responsables de la expresión de los genes de inmunoglobulinas por parte de Susumu Tonegawa la inmunología ha cambiado la forma de ver diagnosticar y tratar las enfermedades

Relevamiento de la investigación y la innovación en la República de Guatemala Lemarchand, Guillermo A., 2017-05-08 Fundamentos de Inmunología básica y su correlación clínica Erik Honigsmann de Beraza, 2018-02-15

La inmunología es una ciencia que relativamente tiene poco de conocerse por lo que los descubrimientos en torno a ella crecen día con día Esto ha hecho que la cantidad de información actual sea vasta y compleja dificultando su análisis y entendimiento Actualmente existen diversos libros de texto artísticos y recursos electrónicos que intentan ser un medio importante para aquellos que se inician en esta ciencia sin embargo en muchos casos como en los recursos electrónicos esta información es errónea y en el caso de los libros de texto y artísticos muchos de ellos no se encuentran asequibles Este material de apoyo ayuda a mejorar el aprendizaje de la materia ya que cada tema del libro es explicado de una manera sencilla y sintetizada de tal manera que su comprensión sea mucho más rápida Facilita la lectura y el estudio en el alumno y en caso de querer profundizar más en los temas se expone la bibliografía al final de cada capítulo Además de lo anterior se espera que a futuro el profesionalista utilice este material como referencia para las diversas

actividades que tenga que realizar tanto académicamente como profesionalmente. Por ello en este libro se revisan los temas más importantes y relevantes entorno a la inmunología dándole un enfoque importante en el real clínico. Para el desarrollo de este material se realizó una investigación documental de diversas fuentes bibliográficas lo que permitió el desarrollo de seis capítulos. Uno introductorio en donde se habla sobre cómo nació la inmunología algunos conceptos básicos tales como la diferencia entre inmunología resistencia e inmunidad la función que tiene la respuesta inmunológica su clasificación actual algunos aspectos que hay que tener en cuenta sobre la inmunidad las células que forman al sistema inmunológico una revisión básica sobre su anatomía fisiología e histología del sistema inmunológico y la formación o nacimiento de linfocitos T y B. Un segundo capítulo en donde se repasan los mecanismos inespecíficos de defensa también llamado inmunidad innata aquí se realiza una revisión sobre las barreras físicas químicas y biológicas sitios inductores de la respuesta inmunológica el sistema de remoción de partículas la función de algunas moléculas péptidos citocinas quimiocinas y complemento frente a agentes extraños el proceso de inflamación fiebre y fagocitosis. En el tercer capítulo se revisan los mecanismos específicos de defensa o la inmunidad humoral aquí se repasan algunos conceptos sobre inmunógenos antígenos inmunoglobulinas la importancia de los linfocitos T y B y el HLA. Del cuarto capítulo al sexto se revisan temas en donde la inmunología tiene aplicación ya sea para entender enfermedades o para realizar tratamientos alternativos. Por ejemplo se revisan algunos desórdenes inmunológicos vacunas en México y en el mundo sueros e inmunoglobulinas y algunos inmunomoduladores y para finalizar algunas áreas de interés de la inmunología en donde se discuten temas como la muerte celular envejecimiento cáncer y la respuesta inmunológica en la obesidad inmunoparasitología y una nueva área de estudio denominada psiconeuroendocrinoinmunología.
