Temas Lab Tapes:

Video as Method Anne M. Harris, 2016-01-21 Perhaps the greatest strength of choosing video as a method for social research is its flexible and almost limitless potential for gathering, analyzing, writing up and disseminating the research findings. Understanding the rich potential of video as both method and methodology is a process inextricably linked to epistemological study design analysis and dissemination choices. As technology and media have evolved, video has become a primary tool of presenting information and ideas and a means of culture making. *Video as Method* provides researchers with a guide to understanding, designing, conducting and disseminating video based research and the rapid proliferation of approaches, uses and designs now available. In the face of large data sets and the great range of types and uses of video as an effective research tool, many researchers struggle to know how best to represent both video based methodologies and research findings. Anne Harris provides in depth examples in each chapter and guides readers step by step through the chapter topics in a methodical fashion that mirrors the research journey.

Video-based Research in Education Lihua Xu, George Aranda, Wanty Widjaja, David Clarke, 2018-11-09 The rapid development of video technology in the last decade has changed the ways in which people communicate, how they learn and how research is done. Video technology offers rich potential in capturing complex social interactions over a prolonged period of time and in supporting teacher professional learning and development. This book explores the ontological, epistemological, methodological and ethical challenges associated with the different uses of video in research, ranging from video as a tool for investigating social interactions and for stimulating participants' reflection to the use of video for engaging varied communities and social groups in the process of teaching, learning and research. Each chapter presents the authors' critical reflection on the ways in which video was employed, the research decisions made, the methodological challenges faced and the consequences for how educational practices were understood. As such, it illustrates a wide range of philosophical and theoretical standpoints with respect to video based research approaches. This book will stimulate broad and rich discussion among education researchers who are interested in video research and contributes to advancing knowledge of the field, developing approaches to dealing with emergent ethical, theoretical and methodological issues and generating new protocols and guidelines for conducting video based research across a variety of disciplinary areas in education.
