Mary Abby Thaxter Peloubet

Tempestuous Shore:

Shipwrecks and the Bounty of the Sea David Cressy, 2022-08-11 Shipwrecks and the Bounty of the Sea is a work of social history examining community relationships law and seafaring over the long early modern period It explores the politics of the coastline the economy of scavenging and the law of wreck of the sea from the beginning of the reign of Elizabeth I to the end of the reign of George II England's coastlines were heavily trafficked by naval and commercial shipping but an unfortunate percentage was cast away or lost Shipwrecks were disasters for merchants and mariners but opportunities for shore dwellers As the proverb said it was an ill wind that blew nobody any good Lords of manors local officials officers of the Admiralty and coastal commoners competed for maritime cargoes and the windfall of wreckage which they regarded as providential godsend or entitlements by right A varied haul of commodities wines furnishings and bullion came ashore much of it claimed by the crown The people engaged in salvaging these wrecks came to be called wreckers and gained a reputation as violent and barbarous plunderers Close attention to statements of witnesses and reports of survivors shows this image to be largely undeserved Dramatic evidence from previously unexplored manuscript sources reveals coastal communities in action collaborating as well as competing as they harvested the bounty of the sea

Speedie, 2021-06-08 There are few marine creatures as spectacular as the Basking Shark At up to 11 metres in length and seven tonnes in weight this colossal plankton feeding fish is one of the largest in the world second only to the whale shark Historically Basking Sharks were a familiar sight in the northern hemisphere off the coasts of Norway Scotland Ireland Canada and the USA for example In an 18th Century world without electricity they became the focus of active hunting for their huge livers containing large amounts of valuable oil primarily used in lamps Catch numbers were small enough to leave populations largely intact but during the 20th Century a new breed of hunter joined the fray some driven as much by a need for adventure as for financial gain With improved equipment and experience they exploited the shark on an industrial scale that drastically reduced numbers leading to localised near extinction in some areas From the 1970s onward a new

generation took to the seas this time with conservation in mind to identify where the shark might still be found in the waters around the British Isles employing new technologies to solve long standing mysteries about the behaviour of this elusive creature Using the best of both old and new research techniques the case was built to justify the species becoming one of the most protected sharks in the oceans Today the Basking Shark is a much loved cornerstone of our natural heritage There are positive signs that the population has stabilised and may even be slowly recovering from the damage of the past proving that timely conservation measures can be effective Join us on a journey amidst wild seas places people and conservation history in the battle to protect this iconic creature a true sea monster s tale Select Notes Mary Abby Thaxter Peloubet,1890
