techniques and methods      **The Hindu Temple** George Michell,1988-09-15 For more than 1500 years from the Indian subcontinent to the islands of the Indonesian archipelago the temple has embodied and symbolized the Hindu worldview at its deepest level and inspired the greatest architectural and artistic achievements in Hindu Asia In *The Hindu Temple* considered the standard introduction to the subject George Michell explains the cultural religious and architectural significance of the temple He illustrates his points with a profusion of photographs building plans and drawings of architectural details making the book a useful guide for travelers to Asia as well as an illuminating text for students of architecture religion and Asian civilizations Michell s discussion of the meaning and forms of the temple in Hindu society encompasses the awe inspiring rock cut temples at Ellora and Elephanta the soaring superstructures and extraordinary sexual exhibitionism of the sculptures at Khajuraho and the colossal mortuary temple of Angkor Wat as well as the tiny iconic shrines that many Hindus wear around their necks and the simple shrines found under trees or near ponds      **Sacred Geography** Sage Earthkeeper,AI,2025-03-29 *Sacred Geography* examines the profound connections between indigenous cultures and their environments highlighting how spiritual beliefs shape settlement patterns and resource management It argues that these cultures possess intricate knowledge systems integrating the physical and spiritual realms creating unique sacred geographies For example ancestral songlines of Aboriginal Australians demonstrate how cultural narratives are interwoven with the land Another intriguing insight is how topography and natural resources are often viewed as deeply intertwined with cosmological understandings The book explores these concepts across three sections First it introduces the foundational concepts of sacred geography Second it presents case studies from the Americas Australia and the Pacific Islands Finally it addresses modern challenges like resource extraction and climate change demonstrating how these geographies are threatened and what indigenous communities are doing to protect them This interdisciplinary approach drawing from anthropology religious studies and environmental science emphasizes the importance of indigenous knowledge for environmental stewardship It challenges conventional Western perspectives by revealing how indigenous peoples maintain a reciprocal relationship with the environment actively manifesting their beliefs in daily life      *The Temple in South Asia* Adam Hardy,2007-01-01      **A Commentary on the Revised Version of the New Testament** William Gilson Humphry,1882      *Asia* René de Berval,1953      *Monumentality and the Roman Empire* Edmund Thomas,2007-11-16 The quality of monumentality is attributed to the buildings of few historical epochs or cultures more frequently or consistently than to those of the Roman Empire It is this quality that has helped to make them enduring models for builders of later periods This extensively illustrated book the first full length study of the concept of monumentality in Classical Antiquity asks what it is that the notion encompasses and how significant it was for the Romans themselves in moulding their individual or collective aspirations and identities Although no single word existed in antiquity for the qualities that modern authors regard as making up that term its Latin derivation from monumentum a monument attests plainly to the presence of the concept in

the mentalities of ancient Romans and the development of that notion through the Roman era laid the foundation for the classical ideal of monumentality which reached a height in early modern Europe This book is also the first full length study of architecture in the Antonine Age when it is generally agreed the Roman Empire was at its height By exploring the public architecture of Roman Italy and both Western and Eastern provinces of the Roman Empire from the point of view of the benefactors who funded such buildings the architects who designed them and the public who used and experienced them Edmund Thomas analyses the reasons why Roman builders sought to construct monumental buildings and uncovers the close link between architectural monumentality and the identity and ideology of the Roman Empire itself
